Southeast Asian Perspectives on Security Derek Da Cunha, 2000 The conventional understanding of strategic issues in the modern world has been very much a Western driven phenomenon That is to say Western strategists thinkers and writers have tended to establish the principles of strategic concepts and to develop theories around them While there is utility in much Western strategic thought it is also apt to note that some of it does not have full relevance or validity when applied to a regional setting that is far removed from the geographical boundaries of the Western world In that connection this volume is partly intended to serve as an antidote to much of the Western commentary on Asia Pacific security issues by providing a range of perspectives on those issues from the Southeast Asian point of view It offers a range of Southeast Asian perspectives on the multifaceted security issues that confront the Asia Pacific region in the post Cold War era That there is no unitary perspective emanating from the region is symptomatic of the very fluid geopolitical situation that characterizes Asia Pacific security and of equal import the different schools of thought that analysts in the region have chosen to subscribe to

Nuclear Risk Reduction in South Asia Michael Krepon, 2004-11-26 The essays in this collection explore and analyze how to reduce the risk of nuclear war in South Asia Contributors work to introduce the theory and methodology of nuclear risk reduction to provide specific measures that might work best in the region and to consider the consequences of missile defense options for stability in Asia Much work is needed to reduce nuclear dangers between India and Pakistan While the fact that both countries possess nuclear weapons may prevent a full blown conventional or nuclear war the presence of these weapons in the region may also encourage the use of violence at lower levels expecting escalation to be contained by a mutual desire to avoid the nuclear threshold One only needs to look at the Kashmir conflict for confirmation of this paradox with serious crises coming more frequently with more severity since the nuclear tests of 1998 Sustained efforts along the line suggested by the contributors of this volume are a crucial step toward reducing nuclear risk on the Subcontinent
