Critical Approaches to Security Laura J. Shepherd, 2013 Focusing on critical approaches to security this new textbook offers readers both an overview of the key theoretical perspectives and a variety of methodological techniques With a careful explication of core concepts in each chapter and an introduction that traces the development of critical approaches to security this textbook will encourage all those who engage with it to develop a curiosity about the study and practices of security politics Challenging the assumptions of conventional theories and approaches unsettling that which was previously taken for granted these are among the ways in which such a curiosity works Through its attention to the fact that and the ways in which security matters in global politics this work will both pioneer new ways of studying security and acknowledge the noteworthy scholarship without which it could not have been thought This textbook will be essential reading to advanced undergraduate and postgraduate students of critical security studies and highly recommended to students of traditional security studies International Relations and Politics

Seeking Security in an Insecure World

Dan Caldwell, Robert E. Williams Jr., 2016-02-24 This revised edition of *Seeking Security in an Insecure World* provides a thorough accessible introduction to contemporary security studies All chapters are updated and a wide range of new topics are discussed including the Syrian civil war Russia's annexation of Crimea and its intervention in East Ukraine the global refugee crisis China's military buildup the impact of fracking on oil and gas markets and rapidly evolving cyberwar capabilities Each chapter also addresses what has been and can be done to enhance security Overall *Seeking Security in an Insecure World* offers a clear and compelling framework for understanding what security means today and how it can best be achieved

Research Methods in Critical Security Studies Mark B. Salter, Can E. Mutlu, Philippe M. Frowd, 2023-05-12 This textbook surveys new and emergent methods for doing research in critical security studies filling a gap in the literature The second edition has been revised and updated This textbook is a practical guide to research design in this increasingly established field Arguing for serious attention to questions of research design and method the book develops accessible scholarly overviews of key methods used across critical security studies such as ethnography discourse analysis materiality and corporeal methods It draws on prominent examples of each method's objects of analysis relevant data and forms of data collection The book's defining feature is the collection of diverse accounts of research design from scholars working within each method each of which is a clear and honest recounting of a specific project's design and development This second edition is extensively revised and expanded Its 33 contributors reflect the sheer diversity of critical security studies today representing various career stages scholarly interests and identities This book is systematic in its approach to research design but keeps a reflexive and pluralist approach to the question of methods and how they can be used The second edition has a new forward looking conclusion examining future research trends and challenges for the field This book will be essential reading for upper level students and researchers in the field of critical security studies and of much interest to students in International Relations and across the social sciences

Critical Security Studies in the Digital Age Joseph Downing, 2023-01-23 This book demonstrates that the disciplinary boundaries present within international relations approaches to security studies are redundant when examining social media and inter and multi disciplinary analysis is key A key result of the analysis undertaken is that when examining the social media sphere security scholars need to expect the unexpected This is because social media enables users to subvert contest and create security narratives with symbols and idioms of their choice which can take into account traditional security themes but also unexpected and under explored themes such as narratives from the local context of the users towns and cities and the symbolism of football clubs The book also explores the complex topography of social media when considering constructions of security The highly dynamic topography of social media is neither elite dominated and hierarchical as the Copenhagen School conceptualises security speak However neither is it completely flat and egalitarian as suggested by the vernacular security studies non elite approach Rather social media's topography is shifting and dynamic with individuals gaining influence in security debates in

unpredictable ways In examining social media this book engages with the emancipatory burden of critical security studies This book argues that it remains unfulfilled on social media and rather presents a thin notion of discursive emancipation where social media does provide the ability for previously excluded voices to participate in security debates even if this does not result in their direct emancipation from power hierarchies and structures offline

The New International Law Christoffer C. Eriksen, Marius Emberland, 2010-10-25 This volume contains revised versions of a select number of research papers presented at a conference in Oslo Norway entitled The New International Law The conference was subtitled Polycentric Decision making Structures and Fragmented Spheres of Law What Implications for the New Generation of International Legal Discourse This subtitle signals the most important elements of the conference s main purpose which was to be a project in line with certain strands of contemporary scholarship on international law scholarship that bases itself on certain assumptions regarding what are important and changing preconditions for the field of international law research Such assumptions include the transformation of sovereignty the horizontal and vertical dispersal of governmental authority the incompleteness of municipal law for legal regulation of individuals and private entities states acceptance of treaty regimes whereby international authorities exercise regulatory power that interferes with domestic authority and the proliferation of new dispute settling bodies on the international plane The volume aims to display the diversity within the new generation of international legal scholarship and to bring the analyses and arguments of this research to a wider audience Topics addressed include environmental regulation human rights and humanitarian protection criminal law and international security and development

Critical Reflections on Security and Change Stuart Croft, Terry Terriff, 2013-02-01 The contributors reflect critically on security studies since the 1980s They conclude that analysts and policy makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future

The New Security Helen Forbes-Mewett, 2018-04-24 The New Security places the concept of security under the spotlight to analyse its meaning in an original and contemporary context In so doing Forbes Mewett revisits the notion from the perspectives of individuals and communities to understand what security means in our culturally diverse contemporary society Chapters highlight the extent of the shift of traditional uses of the term from the established perspective of international relations to a more commonly used concept which now broadly relates to many aspects of peoples everyday experiences Based on empirical studies of security in relation to housing employment food personal security and campus settings in times of perceived heightened risk this book presents new and different ways of thinking about security to demonstrate how we need to expand the dialogue surrounding the concept Drawing on empirical research to describe analyse and reposition the concept of security to have meaning in diverse everyday contexts this methodological and insightful text will be of particular interest to scholars and students of criminological theory security studies and sociology

The Relationship between Human Security Discourse and International Law Shireen Daft, 2017-12-01

The concept of human security has emerged in international relations and policy as an idea which not only seeks to relocate the focus of international society on the individual but also challenges the current priorities of the international community. In particular, it places emphasis on promoting and facilitating a nexus between security development and human rights. It is potentially a paradigm in the making, gaining considerable momentum within the UN, international relations scholarship and regional bodies. And yet, by and large, it continues to be unexplored by the international legal community despite the success of a number of international treaties being attributed to the discourse. This book seeks to address this gap and establish the nature of the relationship between human security discourse and international law, determining whether human security can meaningfully contribute to the international legal framework. To determine this, the book analyses the core principles of human security discourse and examines the degree to which they find parallels in the existing normative structure of international law. The book examines how the broad/narrow debate that dominates human security discourse has played out in international law making. It goes on to consider the processes for the creation of so-called human security treaties in order to determine a blueprint for future development of international human security treaty law. In concluding, Shireen Daft sets out a structured/principled approach through which international legal scholarship can engage with human security, highlighting the ways in which engagement between the two fields can be sustained.

Germany's New Security Demographics Wenke Apt, 2013-12-04 Military recruitment will become more difficult in times of demographic aging. The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests. Since contemporary military operations still display a strong human element, particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth. An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future. A concluding review of recruiting practices in other NATO countries provides insight in best practice policy options to reduce the military's sensitivity to demographic change. Following this approach, the book gives prominence to a topic that has thus far been under-represented in the greater discussion of demographic change today, namely the demographic impact on international affairs and strategic calculations.

Indo-Pacific Strategic Churn Chintamani Mahapatra, 2025-06-18 This book offers a thorough examination and analysis of key developments in the Indo-Pacific region, providing valuable insights for foreign policy professionals, academics and researchers in geopolitics and international relations. The editor, a long-time observer of Indo-Pacific affairs, has curated contributions from leading Indian scholars, each writing within their area of expertise. This volume is a carefully coordinated effort to present an Indian perspective on the rapid and complex changes in the Indo-Pacific. It offers a comprehensive look at major regional stakeholders, critical strategic challenges to peace and stability, and ongoing non-traditional security issues impacting the area.

Human and Water Security in Israel and

Jordan Philip Jan Schäfer, 2012-10-28 The work aims at answering the question as to how far discourses on human security are present in Jordan and Israel if they converge and if political solutions for the issue of water security could be derived The analysis is based on the assumption that from human security perspective common solutions for urgent problems can be derived more easily than out of a perspective of national security Yet it is acknowledged that according to a new security perspective different security threats are being identified by relevant actors An empirical analysis of written statements and utterances of the respective security elites establishes the methodological tool for the identification of human security discourses in Israel and Jordan Subsequently it is estimated how far water is presented as a matter of national security in Israel and Jordan using the theory of securitization **Reconceptualising Arms Control** Neil Cooper, David

Mutimer, 2014-01-02 The theory and practice of arms control seemed to have its heyday during the height of the Cold War with its focus on the East West conflict and nuclear arms In the past twenty years both arms technologies and various practices aimed at their control have continued to develop but scholarly thinking has not kept up This volume seeks to redress this scholarly neglect of the range of issues associated with the control of the means of violence by asking the question what does arms control mean in the 21st Century In asking this question the volume examines issues surrounding sovereignty geopolitics nuclear disarmament securitization of space technological developments human rights the clearance of landmines the regulation of small arms and the control of the black market for arms and nuclear secrets The book discusses terrorism with reference to the case of the suicide attacks in Beirut in 1983 and how the Obama administration is orientating its posture on nuclear arms This book was published as a special issue of Contemporary Security Policy
