Seeds and Fruits of Plants of Eastern Canada and Northeastern United States, 1978 Seeds and Fruits of Plants of Eastern Canada and Northeastern United States Frederick Howard Montgomery, *Seeds and Fruits of Plants of Eastern Canada and Northeastern United States* F. H. Montgomery, 1977 Hitherto there has been no way to identify Canadian and US seed samples except to compare them with known specimens Identification has been a process of elimination depending on the experience knowledge and memory of the observer The Seeds and Fruits of Plants of Eastern Canada and Northeastern United States describes and illustrates the seeds of about 1100 species of native wild and introduced weedy plants from some 118 families and provides keys for their identification based on their geometric shapes The primary tool used in describing the shape of the seeds and keying them is the chart of symmetric plane figures developed by the Systematics Association Committee of the International Association Plant Taxonomy That seeds which were obtained from herbaria or the author's own collection were thus sorted and classified according to the exact shape of their longitudinal and cross sections to form the major sections of the key Morphological details observed under magnifications up to 30 x were then used both for minor separations in the key and in describing species Photography was chosen as the most accurate means of illustration While primarily intended for taxonomists and those teaching seed identification as a text and for verification of identifications this book will also be an important reference for studies of archaeology studying seed remains ecologists studying bog formations and soil analysts both in Canada and the US Guide to Sources for Agricultural and Biological Research J. Richard Blanchard, Lois Farrell, 2023-07-28 *A Guide to Wildflowers in Winter* Carol Levine, 1995-01-01 A guide to identifying herbaceous weeds and wildflowers as they are found in winter in the northeastern United States and eastern Canada featuring illustrated in depth entries on 391 species of herbaceous plants and briefer mentions of 191 similar species

**Indigenous Life around the Great Lakes** Richard W. Edwards IV, 2020-09-30 Enormous changes affected the inhabitants of the Eastern Woodlands area during the eleventh through fifteenth centuries AD At this time many groups across this area known collectively to archaeologists as Oneota were aggregating and adopting new forms of material culture and food technology This same period also witnessed an increase in intergroup violence as well as a rise in climatic volatility with the onset of the Little Ice Age In *Indigenous Life around the Great Lakes* Richard W Edwards explores how the inhabitants of the western Great Lakes region responded to the challenges of climate change social change and the increasingly violent physical landscape As a case study Edwards focuses on a group living in the Koshkonong Locality in what is now southeastern Wisconsin Edwards contextualizes Koshkonong within the larger Oneota framework and in relation to the other groups living in the western Great Lakes and surrounding regions Making use of a canine surrogacy approach which avoids the destruction of human remains Edwards analyzes the nature of groups subsistence systems the role of agriculture and the risk management strategies that were developed to face the challenges of their day Based on this

analysis Edwards proposes how the inhabitants of this region organized themselves and how they interacted with neighboring groups Edwards ultimately shows how the Oneota groups were far more agricultural than previously thought and also demonstrates how the maize agriculture of these groups was related to the structure of their societies In bringing together multiple lines of archaeological evidence into a unique synthesis Indigenous Life around the Great Lakes is an innovative book that will appeal to archaeologists who study the Midwest and surrounding regions and it will also appeal to those who research risk management agriculture and the development of hierarchical societies more generally Cahokia and the Hinterlands Thomas E. **Excavation** Jodie A. O'Gorman, 1989 *Biology and ecology of weeds* W. Holzner, M. Numata, 2013-03-14 Weeds are a fascinating study for specialists not only because of their economic importance but also since in this case biology must be combined with history and agriculture and its economic aspects Thus weed scientists may be concerned with pure basic research concentrating on general aspects or with applied science i e having a practical orientation One of the aims of this book is to create a synthesis between these two branches of study and to review the literature of both fields The agrestals the weeds of arable land the most important group from an economic point of view was chosen as the main topic Other weed groups could only be mentioned briefly e g grassland weeds or superficially e g aquatic weeds or had to be omitted completely e g ruderals because they are so heterogeneous to keep this volume to an acceptable size and price Nevertheless nearly all subsections of botanical science have been treated **Andean Foodways** John E. Staller, 2020-12-01 There is

widespread acknowledgement among anthropologists archaeologists ethnobotanists as well as researchers in related disciplines that specific foods and cuisines are linked very strongly to the formation and maintenance of cultural identity and ethnicity Strong associations of foodways with culture are particularly characteristic of South American Andean cultures Food and drink convey complex social and cultural meanings that can provide insights into regional interactions social complexity cultural hybridization and ethnogenesis This edited volume presents novel and creative anthropological archaeological historical and iconographic research on Andean food and culture from diverse temporal periods and spatial settings The breadth and scope of the contributions provides original insights into a diversity of topics such as the role of food in Andean political economies the transformation of foodways and cuisines through time and ancient iconographic

representations of plants and animals that were used as food Thus this volume is distinguished from most of the published literature in that specific foods cuisines and culinary practices are the primary subject matter through which aspects of Andean culture are interpreted     Tracking Environmental Change Using Lake Sediments John P.
