Seeds From Our Past:

The Age of Seeds Fiona McMillan-Webster, 2022-07-26 Plants evolved seeds to hack time Thanks to seeds they can cast their genes forward into the future enabling species to endure across seasons years and occasionally millennia When a 2000 year old extinct date palm seed was discovered no one expected it to still be alive But it sprouted a healthy young date palm That seeds produced millennia ago could still be viable today suggests seeds are capable of extreme lifespans Yet many seeds including those crucial to our everyday lives don't live very long at all In *The Age of Seeds* Fiona McMillan Webster tells the astonishing story of seed longevity the crucial role they play in our everyday lives and what that might mean for our future

Grain World ,1909 Seed Libraries Cindy Conner, 2015-02-01 Community based initiatives to preserve and protect our food supply Historically seed companies were generally small often family run businesses Because they were regionally based they could focus on varieties well suited to the local environment A Pacific Northwest company for example would specialize in different cultivars than a company based in the Southeast However the absorption of these small independent seed businesses into large multinationals combined with the advancement of biotechnology resulting in hybrids and GMO seeds has led to a serious loss of genetic diversity The public is now at the mercy of the corporations that control the seeds In the past few years gardeners have realized the inherent danger in this situation A growing movement is striving to preserve and expand our stock of heritage and heirloom varieties through seed saving and sharing opportunities Seed Libraries is a practical guide to saving seeds through community programs including Step by step instructions for setting up a seed library A wealth of ideas to help attract patrons and keep the momentum going Profiles of existing libraries and other types of seed saving partnerships Whoever controls the seeds controls the food supply By empowering communities to preserve and protect the genetic diversity of their harvest Seed Libraries is the first step towards reclaiming our self reliance while enhancing food security and ensuring that the future of food is healthy vibrant tasty and nutritious Cindy Conner is a permaculture educator founder of Homeplace Earth and producer of two popular instructional gardening DVDs She is also the author of *Grow a Sustainable Diet* **Plants from the Past** Leonard Watson Blake, Hugh Carson Cutler, 2001 Covering a period of 30 years and tracing the development of the study of plant remains from archaeological sites this volume gives archaeologists access to previously unavailable data and interpretations It features the much sought after extensive inventory *Plants from Archaeological Sites East of the Rockies* which serves as a reference to archaeobotanical collections curated at the Illinois State Museum The chapters dealing with protohistory and early historic foodways and trade in the upper Midwest are especially relevant at this time of increasing attention to early Indian white interactions Book jacket
