Derek Bewley, Kent Bradford, Henk Hilhorst, Hiroyuki Nonogaki, 2012-10-23 In its updated and revised third edition this book reviews 15 years of advances in seed biology Describes new research in the molecular biology of development and germination and fresh insights on dormancy and how seeds respond to their environment

Seeds J. Derek Bewley, Michael Black, 1994-07-31 In response to enormous recent advances particularly in molecular biology the authors have revised their warmly received work This new edition includes updates on seed development gene expression dormancy and other subjects It will serve as the field s standard textbook and reference source for many years to come

Seeds J. Bewley, 2012-12-06 Since the publication of our monograph on seed physiology and biochemistry *The Physiology and Biochemistry of Seeds in Relation to Germination* Springer Verlag 1978 1982 it has been suggested to us that a text covering the same subject area would be appropriate This book is our response Unlike the previous volumes however this text is not intended to be either a critical or a comprehensive account Instead it is a more generalized consideration of the essential aspects of seed physiology and biochemistry as we see them It also includes a substantial amount of new and different material In a work of this sort it is inevitable that some simplifications must be made but we hope nevertheless that we have presented the most reasonable conspectus of areas of controversy and uncertainty In this respect literature citations have been kept to a minimum and do not interrupt the text they are placed at the end of each chapter and are intended to be used as a source for further references We hope that this book will be of value to students and teachers in universities colleges and other institutes of higher learning whose courses include plant biology Although it is particularly appropriate for studies of seed biology it should also find broader applications in general plant physiology agriculture and horticulture

Seeds J. Bewley, 1995-12-31 **Seeds** Bewley J. Derek, 1985 **Seeds** Carol C. Baskin, Jerry M.

Baskin, 2001 *Seeds Ecology Biogeography and Evolution of Dormancy and Germination* provides a working hypothesis of the ecological and environmental conditions under which various kinds of seed dormancy have developed It also presents the seed germination of more than 3500 species of trees shrubs vines and herbaceous species

Cellular and Molecular Biology of Plant Seed Development Brian A. Larkins, Indra K. Vasil, 1997-09-30 The beginnings of human civilization can be traced back to the time nearly 12 000 years ago when the early humans gradually changed from a life of hunting and gathering food to producing food This beginning of primitive agriculture ensured a dependable supply of food and fostered the living together of people in groups and the development of society During this time plants seeds were recognized as a valuable source of food and nutrition and began to be used for growing plants for food Ever since plant seeds have

played an important role in the development of the human civilization Even today s e e ds of a few crop s p e c i e s s uc h as the cereals and legume s are the primary s o u r c e of most human food and the predominant commodity in international agriculture Owing to their great importance as food for human s and in international trade seeds have been a favorite object of s t u d y by developmental biologists and physiologi sts nutritionist s and chem i sts A wealth of useful information i s available on th e biology of seed s *Seed Development and Germination* Jaime Kigel,2017-11-01 This text is intended for plant physiologists molecular biologists biochemists biotechnologists geneticists horticulturalists agromnomists and botanists and upper level undergraduate and graduate students in these disciplines It integrates advances in the diverse and rapidly expanding field of seed science from ecological and demographic aspects of seed production dispersal and germination to the molecular biology of seed development The book offers a broad multidisciplinary approach that covers both theoretical and applied knowledge Seeds, 3rd Edition Robert S Gallagher,2013-12-06 The 3rd edition of *Seeds The Ecology of Regeneration in Plant Communities* highlights the many advances in the field of seed ecology and its relationship to plant community dynamics that have taken place in recent years The new edition also features chapters on seed development and morphology seed chemical ecology implications of climate change on regeneration by seed and the functional role of seed banks in agricultural and natural ecosystems The book is aimed at advanced level students and researchers in the fields of seed science seed ecology and plant ecology Advances in Agronomy ,1997-08-07 Written by international authorities in agronomy Volume 61 contains five comprehensive reviews covering key contemporary topics on crop and soil sciences As always the topics are varied and exemplary of the array of subject matter covered by this long running serial In this volume a definitive treatise on dynamic conservation of plant genetic resources is included as is an environmentally timely update on coal surface mine reclamation practices contemporary and thorough reviews of diffusion in the soil plant system dorminancy germinability and germination in crop and weed seeds and control of soil borne plant pests With this latest volume *Advances in Agronomy* continues to be recognized as a leading reference and as a first rate source of the latest research in agronomy crop science and soil science The control of soil borne plant pests Ion diffusion in the soil plant system Dormancy germinability and germination in crop and weed seeds Dynamic conservation of plant genetic resources Coal surface mine reclamation **The Encyclopedia of Seeds** J. Derek Bewley,Michael Black,Peter Halmer,2006 This is the first scholarly reference work to cover all the major scientific themes and facets of the subject of seeds It outlines the latest fundamental biological knowledge about seeds together with the principles of agricultural seed processing storage and sowing the food and industrial uses of seeds and the roles of seeds in history economies and cultures With contributions from 110 expert authors worldwide the editors have created 560 authoritative articles illustrated with plentiful tables figures black and white and color photographs suggested further reading matter and 670 supplementary definitions The contents are alphabetically arranged and cross referenced to connect related entries *Seeds* Steve W.
