## **Seeing Perception Looking At The World Through An Artists Eye:**

*Seeing/perception* ,2001 Poetry Art SEEING PERCEPTION contains poems by Ann O Hanlon and photographs by both Dick and Ann O Hanlon artists travelers and teachers who were mentors to an entire community of artists and students from their Mill Valley Calif center for Sight and Insight From Ann and Dick O and their place I learned for example ways of looking that I have not ceased to think about Wendell Berry **Small Press Review** ,1998 *The Visibility of the Image* Lambert Wiesing,2016-09-22 Now available in English for the first time The Visibility of the Image explores the development of an influential aesthetic tradition through the work of six figures Analysing their contribution to the progress of formal aesthetics from its origins in Germany in the 1880s to semiotic interpretations in America a century later the six chapters cover Robert Zimmermann 1824 1898 the first to separate aesthetics and metaphysics and approach aesthetics along the lines of formal logic providing a purely syntactic way of using signs regardless of objective content Alois Riegl 1858 1905 who went on to further develop aesthetics on the model of formal logic creating a theory of style in response to Zimmermann s call for an aesthetics oriented toward formal logic Heinrich W lfflin 1864 1945 who represents a step toward an understanding of consciousness by using pictures as cognitive tools Konrad Fiedler 1841 1895 the Saxon philosopher who considered the possibility that some kinds of images are made and viewed not for what they show but for their visibility s sake alone Maurice Merleau Ponty 1908 1961 responsible for taking up the connections between the problems of reducing the range of potential meanings and contexts of a given image down to just the picture surface Charles William Morris 1901 1979 who set out to establish whether a picture with no objective reference such as an abstract painting still counts as a sign and if so in what sense Bringing these thinkers together and interlinking their ideas Lambert Wiesing presents an engaging history of formal aesthetics while reconstructing the philosophical foundations for the appearance of new image forms in the 20th century including the video clip abstract collage digital simulation and virtual reality Using this original approach The Visibility of the Image introduces the rise of modern image theory and provides a valuable account of our engagement with pictures in the 21st century *Artistic Creation* Jeff Mitscherling,Paul Fairfield,2019-04-29 Artistic creation has proven remarkably resistant to philosophical analysis Artists have long struggled to explain how they do what they do and philosophers have struggled along with them This study does not attempt to offer a comprehensive account of all creativity or all art Instead it tries to identify an essential feature of an activity that has been cloaked in mystery for as long as history records Jeff Mitscherling and Paul Fairfield argue that the process by which art is created has a good deal in common with the experience of the audience of a work and that both experiences may be described phenomenologically in ways that show surprising affinities with what artists themselves often report **Odd Perceptions** Richard L. Gregory,2017-03-27 Richard Gregory was one of the major scientific thinkers of our time Originally published in 1986 here he presents essays on the rich subject of perception How we experience colours shapes sounds touches tickles tastes and smells is a mysterious and rich

inquiry Wonderful as these sensations are though he argues that perception becomes really interesting when we consider how objects are identified and located in space and time as things we interact with using our intelligence to understand them Gregory's essays convey the crucial importance of the major scientists and their achievements in the study of perception but they also show us how much we can learn from our surroundings our language our times our successes and our failures Why are we so often fooled in scientific as well as everyday life

**Forthcoming Books** Rose Arny, 2000 **Seeing Through Closed Eyelids** Elizabeth Mangini, 2021-04-07 Can a work of art help us know our world differently In this first scholarly study of Giuseppe Penone art historian Elizabeth Mangini argues that the Italian artist's engagement of the body's multiple senses constitutes a new theory of sculpture as a means to connect with and know the phenomenal world Through close readings of signal works across Penone's five decade career from his emergence in the context of 1960s Arte povera to his position as a pre eminent contemporary artist today Mangini demonstrates how Penone refuses modernist opticality recasts artistic labour and emphasizes a non anthropocentric concept of time Penone's approach challenges viewers to broaden their sensory and temporal perceptions creating structurally significant new ways to understand human experience Giuseppe Penone is best known for his engagement with trees which he employs as raw material imagery and an active force in the creative process Seeing Through Closed Eyelids suggests that such works materialize the perceptible tensions between any organism and its environment By locating Penone's art in its social context and connecting it to broader discourses about art's status theories of phenomenology and the anthropocene this book offers an original reading of Penone's work as well as a wider view of the artistic generation for whom sculpture was a means to probe the nature of experience itself at the dawn of postmodernism
