Seeing Castaneda: reactions to the 'Don Juan' writings of Carlos Castaneda: reactions to the 'Don Juan' writings of Seeing Castaneda Daniel C. Noel,1975 **Seeing** George Gillespie, 2019-11-14 After years of Carlos Castaneda ,1976 lucid dreaming the author spontaneously experiences a series of religious encounters with intense light which bring an awareness of the presence of God He describes a number of these encounters in detail The greater part of the book then presents an analysis of these experiences Perhaps the most unique part of the analysis based on the author's study of his hypnopompic lattice imagery is the description of how the internal visual image is constructed and seen three dimensionally In fact the visual image is shown to be identified with the part of oneself that sees the image Every part of the visual field is a nonduality of seer and seen Finally he analyzes the imagery of dreams out of which the experiences of light arise light as visual image and as spiritual event and the awareness of the presence of God His religious experiences of light are shown not to be dreams but to lie in a sense beyond dream imagery and dreaming The Ethnopoetics of Shamanism M. Santos, 2016-04-30 Over the last century Western portrayals of shamanism have changed radically toward an ethnopoetics of shamanism While shamanic practices had long been indirectly registered by Westerners it is only since the late nineteenth century that they have taken on symbolic import within discourses of primitivism and debates over magic and rationality

Fantasies of the Master Race Ward Churchill,1998 Chosen an Outstanding Book on the Subject of Human Rights in the United States by the Gustavus Myers Center for the Study of Human Rights In this volume of incisive essays Ward Churchill looks at representations of American Indians in literature and film delineating a history of cultural propaganda that has served to support the continued colonization of Native America During each phase of the genocide of American Indians the media has played a critical role in creating easily digestible stereotypes of Indians for popular consumption Literature about Indians was first written and published in order to provoke and sanctify warfare against them Later the focus changed to enlisting public support for civilizing the savages stripping them of their culture and assimilating them into the dominant society Now in the final stages of cultural genocide it is the appropriation and stereotyping of Native culture that establishes control over knowledge and truth The primary means by which this is accomplished is through the powerful publishing and film industries Whether they are the tragically doomed noble savages walking into the sunset of Dances With Wolves or Carlos Castaneda s Don Juan the exotic mythical Indians constitute no threat to the established order Literature and art crafted by the dominant culture are an insidious political force disinforming people who might otherwise develop a clearer understanding of indigenous struggles for justice and freedom This book is offered to counter that deception and to move

people to take action on issues confronting American Indians today Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1977 Forest Lectures on the Highest Yoga Vladimir Antonov,2009-02-11 This book presents a series of lectures about the higher stages of human spiritual development The lectures describe the methodologies of the main philosophico religious traditions that existed in the past or exist now on the Earth This material illustrates the fact that the methodology of spiritual development is one for all people and that in this way God leads all people to Perfection

Restivo, 2012-12-06 The problems I address in this book are among the least studied in the soci ology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge **The Mind of the Novel** Bruce F. Kawin, 2006 From Moby Dick to The Unnamable from A Tale of a Tub to The Book of Questions Bruce Kawin explores the nature of self conscious fiction and compares its structure to that of human consciousness Focusing on texts that confront their own limits by trying to name the unnamable the ineffable self Kawin draws on methods from literary criticism to systems theory to

altered states From early Romanticism to late nineteenth century occultism and from fin de si cle Paris to contemporary psychedelic shamanism psychoactive substances have playedcatalyzing people Yet serious analysis of the religious dimensions of modern drug use is still lacking the use of drugs and the pursuit of transcendence from the nineteenth century to the present day Beginning with the Romantic fascination with opium it chronicles the discovery of anesthetics the psychiatric and religious interest in hashish the bewitching power of mescaline and hallucinogenic fungi the more recent uses of LSD as well as the debates surrounding drugs and religious experience This fascinating and wide ranging sociological and cultural history fills a major gap in the study of religion in the modern world and our understanding of the importance of countercultural thought offering new and timely insights into the controversial relationship between drugs and mystical Historical Dictionary of Shamanism Graham Harvey, Robert J. Wallis, 2015-12-15 A remarkable array of experience people have been called shamans while the phenomena identified as shamanism continues to proliferate This second edition of the Historical Dictionary of Shamanism contains with examples from antiquity up to today and from Siberia where the term shaman originated to Amazonia South Africa Chicago and many other places Many claims about shamans and shamanism are contentious and all are worthy of discussion In the most widespread understandings terms seem to refer particularly to people who alter states of consciousness or enter trances in order to seek knowledge and help from powerful other than human persons perhaps spirits But this says only a little about the artists community leaders spiritual healers or hucksters travelers in alternative realities and so on to which the label shaman has been applied This second edition contains a chronology an introduction and extensive bibliography The dictionary contains over 500 cross referenced dictionary entries on individuals groups practices and cultures that have been called shamanic This book is an excellent access point for students researchers and anyone wanting to know more about Shamanism Mediality on Trial Ehler Voss, 2020-09-21 This volume addresses controversies connected to the testing of the capacities and potentials of mediums Today we commonly associate the term medium with the technical communication between transmitters and receivers Yet this term likewise applies to those who cooperate with agencies that exceed the presumed domain of the material world Insofar as one presumes a division between distinctly opposed categories of religion and the secular technical media tend to be associated with the secular and human trance mediums tend to be associated with religion after 1900 This volume concerns the ways in which the term medium still marks an overlapping of and thus problematizes the aforementioned division between religion and the secular the personal and the technological The term medium carries with it a seed of doubt that is itself inseparable from investment in the medium's power insofar as they communicate with an other realm mediums offer the hope and promise of new possibilities and improved efficiency and thus of a better life yet they have simultaneously been under suspicion of altering or even inventing the messages they communicate It is due to this combination of promise and suspicion that mediumism has tended to evoke scientific religious and moral controversies. Thus we can speak of a mediumistic trial

that is a process in which a medium is put to the test concerning its potentials and trustworthiness Around 1800 experts were asked if a modern secular institution would be capable of inspiring domesticating or excluding trance mediumship This question has stayed with us ever since and the answers have remained inconclusive That is why the past and present of mediumship may be asked to elucidate each other
