Seeing New Worlds:

Representing the New World J. Hart, 2001-09-15 Representing the New World argues for the importance of Spain in the New World as an example of France and England in their efforts to establish colonies and suggests that this example was ambivalent and contradictory as well as surprisingly persistent in the representations of Spain in French and English texts concerning the Americas

Russia and the New World Disorder Bobo Lo, 2015-08-17 A Brookings Institution Press and Chatham House publication The Russian annexation of Crimea was one of the great strategic shocks of the past twenty five years For many in the West Moscow's actions in early 2014 marked the end of illusions about cooperation and the return to geopolitical and ideological confrontation Russia for so long a peripheral presence had become the central actor in a new global drama In this groundbreaking book renowned scholar Bobo Lo analyzes the broader context of the crisis by examining the interplay between Russian foreign policy and an increasingly anarchic international environment He argues that Moscow's approach to regional and global affairs reflects the tension between two very different worlds the perceptual and the actual The Kremlin highlights the decline of the West a resurgent Russia and the emergence of a new multipolar order But this idealized view is contradicted by a world disorder that challenges core assumptions about the dominance of great powers and the utility of military might Its lesson is that only those states that embrace change will prosper in the twenty first century A Russia able to redefine itself as a modern power would exert a critical influence in many areas of international politics But a Russia that rests on an outdated sense of entitlement may end up instead as one of the principal casualties of global transformation

New World Monkeys Alfred L. Rosenberger, 2020-09 This book is a broad synthesis of new world monkey evolution integrating their unique evolutionary story into the bigger picture of primate evolution and Amazon biodiversity Capsule For more than 30 million years New World monkeys have inhabited the forests of South and Central America Whether these primates originally came from Africa by rafting across the Atlantic or crossing overland from North America they soon flourished This book tells the story of these New World monkeys Integrating data from fossil and living animals it explores the evolution of the three major New World monkey lineages as well as how they fit into the broader story of primate evolution and Amazon biodiversity After providing readers with necessary background in primate taxonomy and systematics Rosenberger shows that the notion of adaptive zones is central to our understanding of primate evolution The idea of adaptive zones can explain how radiations evolve morphological adaptations appear and communities form From here Rosenberger synthesizes what is known about New World monkeys unique ecological adaptations including those involving feeding and locomotion as well as their social behaviour The book's concluding chapters explore theories of how primates first arrived in South America and what their future looks like given the threat of extinction Biography Internal Use Only Alfred L Rosenberger is Professor Emeritus of Biological Anthropology at Brooklyn College An expert on the origin and evolution of New World Monkeys Rosenberger has contributed numerous articles in edited volumes and his work is published

[The Perfecting of Nature](#) Josh Doty, 2020-10-05 The nineteenth century saw a marked change in how Americans viewed and understood the human form These new ways of understanding the body reflect how Americans were beginning to see the body's constituent parts as interconnected From the transcendentalists idealized concept of self to the rise of Darwinian theory after the Civil War the era and its writers redefined the human body as both deeply reactive and malleable Josh Doty explores antebellum American conceptions of bioplasticity the body's ability to react and change from interior and exterior forces and argues that literature helped to shape the cultural reception of these ideas These new ways of thinking about the body's responsiveness to its surroundings enabled exercise fanatics cold water bathers cookbook authors and everyday readers to understand the tractable body as a way to reform the United States at the physiological level Doty weaves together analysis of religious texts nutritional guides and canonical literature to show the fluid relationship among bodies literature and culture in nineteenth century America

Environmental Practice and Early American Literature Michael Ziser, 2013-07-29 This original and provocative study tells the story of American literary history from the perspective of its environmental context Weaving together close readings of early American texts with ecological histories of tobacco potatoes apples and honey bees Michael Ziser presents a method for literary criticism that explodes the conceptual distinction between the

civilized and natural world Beginning with the English exploration of Virginia in the sixteenth century Ziser argues that the settlement of the New World and the cultivation and exploitation of its bounty dramatically altered how writers used language to describe the phenomena they encountered on the frontier Examining the work of Harriot Grainger Cooper Thoreau and others Ziser reveals how these authors whether consciously or not transcribed the vibrant ecology of North America and the ways that the environment helped codify a uniquely American literary aesthetic of lasting importance

Victory: Into the Fire Harold Coyle, Harold Robbins, R. J. Pineiro, 2004-05-16 Harold Coyle takes us to the fierce fighting in the Pacific where the Japanese and the Americans clash over a strategic airfield on the island of Guadalcanal Their battlefield will earn the nickname Bloody Ridge from both sides Harold Robbins takes us back to a time when victory could be had on the Normandy beaches if a reluctant hero managed to stop the Master of Europe with his blood R J Pineiro brings the Eastern Front to light as a young American pilot is ordered to train Russian pilots in the new American made P 39D Aircobras during the final months of the brutal battle of Stalingrad in the winter of 1942 Catalog of Copyright Entries, Third Series, 1950 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for registration the copyright date the copyright registration number etc Reconstructing Modernism Ashley Maher, 2020-03-12 Reconstructing Modernism establishes for the first time the centrality of modernist buildings and architectural periodicals to British mid century literature Drawing upon a wealth of previously unexplored architectural criticism by British authors this book reveals how arguments about architecture led to innovations in literature as well as to redesigns in the concept of modernism itself While the city has long been a focus of literary modernist studies architectural modernism has never had its due Scholars usually characterize architectural modernism as a parallel modernism or even an incompatible modernism to literature Giving special attention to dystopian classics Brave New World and Nineteen Eighty Four this study argues that sustained attention to modern architecture shaped mid century authors political and aesthetic commitments After many writers deemed modernist architects to be agents for communism and other collectivist movements they squared themselves and literary modernist detachment and aesthetic autonomy against the seemingly tyrannical utopianism of modern architecture literary aesthetic qualities were reclaimed as political qualities In this way Reconstructing Modernism redraws the boundaries of literary modernist studies rather than simply adding to its canon it argues that the responsibility for defining literary modernism for the mid century public was shared by an incredible variety of authors Edwardians modernists satirists and even anti modernists Unlocking the World John Darwin, 2020-10-01 From the acclaimed historian of global empire the dramatic story of how steam power reshaped our cities and our seas and forged a new world order Steam power transformed our world initiating the complex resource devouring industrial system the consequences of which we live with today It revolutionized work and production but also the ease and cost of movement over land and water The result was to

throw open vast areas of the world to the rampaging expansion of Europeans and Americans on a scale previously unimaginable Unlocking the World is the captivating history of the great port cities which emerged as the bridgeheads of this new steam driven economy reshaping not just the trade and industry of the regions around them but their culture and politics as well They were the agents of what we now call globalization but their impact and influence and the reactions they provoked were far from predictable Nor were they immune to the great upheavals in world politics across the steam century This book is global history at its very best Packed with fascinating case histories from New Orleans to Montreal Bombay to Singapore Calcutta to Shanghai individual stories and original ideas Darwin s book allows us for better or worse to see the modern age taking shape A fine important and original book wonderful Paul Kennedy Literary Review
