**L'ARCHEOLOGIA DEL GRAPHIC NOVEL** Eleonora Brandigi, 2013 The archaeology of the graphic novel does not shed light on the historical origins of the comic book on the contrary it tries to discover the conceptual genesis of this narrative form If the research methodology is archaeological in fact the theoretical approach is the same as neuro narratology in the light of which four important stages are suggested These stages define the comic novel as a natural literary genre a mimesis of the process transposing reality into images and constituting the basis of thought The figure of Rodolphe Töpffer is not excluded from this process Thanks to his theories and his work he leads us to hypothesize that the comic book was more novelistic at its origin than it is in its current forms the path to the novel then would not be so much of an evolution but rather a return to the origins
