A. Houston,2010-08-05 What can we learn from suicide that most personal and often inscrutable of acts This strikingly original work shows how from treatment of suicides in historic Britain unique insights can be gained into the development of both social and political relationships and cultural attitudes in a period of profound change Drawing ideas from a range of disciplines including law philosophy the social sciences and literary studies as well as history the book comprehensively analyses how successful and attempted suicide was viewed by the living and how they dealt with its aftermath using a wide variety of legal fiscal and literary sources By investigating the distinctive institutional environments and mental worlds of early modern England and Scotland it explains why suicide was treated as a crime subject to financial and corporal punishments and it questions modern assumptions about the apparent enlightenment of attitudes in the eighteenth century The book is divided into two parts Part one examines the role of lordship in managing social and economic relationships following suicide and illuminates the importance of distinctive punishments inflicted on suicides bodies for understanding historic communities The second part of the book places suicide in its cultural context analysing the attitudes of early modern people to those who killed themselves It explores religious beliefs and the place of the devil as well as secular and medical understandings of suicide s causes in sources that include provincial newspapers Informed by continental as well as British research Punishing the Dead explicitly compares England and Scotland making this a completely British history It also offers intriguing evidence for the importance of cultural regions and local vernaculars that transcend national boundaries *The Balliol Dynasty* Amanda Beam,2008-05-19 This study examines the political ambitions and influences of the Balliol dynasty in the thirteenth and fourteenth centuries in Scotland England and France The generally accepted opinion in previous historiography was that John II king of Scots from 1292 to 1296 and Edward Balliol d 1364 were politically weak men and unsuccessful kings In a reassessment of the patriarch of the family John I d 1268 the Balliols are revealed as committed English lords and loyal servants of the kings of England underlining how the family has been unfairly judged for centuries by both chroniclers and historians who have assessed them as Scottish kings rather than as English lords Despite the forfeiture of the Balliol estates in England and Scotland in 1296 John II and Edward retained close relationships with the successive English kings and used these connections to fuel their political ambitions Their kingships illustrate their desires to recover some influence in English politics which the family had enjoyed in the mid thirteenth

century This re evaluation of the Balliols highlights their relationship with the English crown

The Bigod Earls of Norfolk in the Thirteenth Century Marc Morris, 2005 Study of one of the most influential aristocratic families of medieval England The Bigods were one of the most powerful and important families in thirteenth century England They are chiefly remembered for their dramatic interventions in high politics Roger III Bigod c 1209-70 famously led the march on Westminster Hall in 1258 against Henry III while Roger IV Bigod 1245-1306 confronted Edward I in 1297 in similar fashion This book is the first full scale study of these two earls and explores in depth the reasons that led each of them to take the extreme step of confronting his king It is only in part however a political study In seeking to understand the motives that lay behind their public actions the book scrutinizes the earls private affairs It establishes for the first time the precise extent of their landed estate the size of their incomes and the membership and quality of their affinities It also examines their relationships with friends and relatives their building works and even their personalities Extensive use is made throughout of unpublished manuscript sources in particular the hundreds of ministers accounts that have survived from the administration of Roger IV Bigod and the charters given by both earls which are calendared and translated in an appendix

Annual Bibliography of English Language and Literature, *A Hertfordshire Demesne of Westminster Abbey* Derek Vincent Stern, 2000 This pioneering contribution to the economic history of medieval England focuses on the Hertfordshire demesne farm of Kinsbourne later Herpendenbury and questions whether the farm's periods of economic success and failure were due to human factors or to the forces of nature Originally written as a doctoral thesis in 1978 the history has now been edited and published as a memorial to its author who died in 1993 The detailed study is based on the meticulous analysis of numerous primary sources which the author concludes suggest that the weather had little impact on the efficiency or otherwise of the manor's management accountancy or exploitation of the market A lengthy introduction places the work within the context of meteorological debate and regional history

Medieval law in context Anthony Musson, 2020-01-03 Examines how medieval people at all social levels thought about law justice and politics as well as their role in society Provides a clear structured view of judicial developments and experience of litigation in the thirteenth and fourteenth centuries Offers a new perspective on both law and politics by focusing on the medium of legal consciousness and legal culture Makes the specialised area of law accessible for the general reader interested in the medieval period

The Commercialisation of English Society, 1000-1500 R. H. Britnell, 1996 The commercialisation of English society offers a major new interpretation of social and economic change in England over five centuries By 1500 English livelihoods depended more upon money and commercial transactions than ever before the institutional framework of markets had been transformed and urban development was more pronounced These changes were not however caused by any unilinear development of population output or money supply This pioneering study examines both institutional and economic transformation and the social changes that resulted and stresses the limited importance of formal trading institutions for the development of local trade Commercial transition is

throughout analysed from a broader perspective that looks at the changing power relations within medieval society which might loosely be described as feudal and considers how these relations were affected by such commercial development
