Selected Intellectual Property and Unfair Competition Roger E. Schechter, 1991 **Selected Intellectual Property and Unfair Competition Statutes, Regulations, and Treaties**, 2008 International Intellectual Property Law and Human Security Robin Ramcharan, 2012-11-27 This book examines how intellectual property rights IPR affect the daily lives of individuals worldwide and how that may in turn impact the health and wealth of nations While the protection of the intellectual endeavours of authors and inventors is vital for a fair and just society it is important that the IPR regime remains flexible enough to encourage creativity innovation and the free flow of information and technology that are critical to the well being of billions of people especially in the developing world This work examines the implications of the IPR regime for basic human security It examines the relationship between IPR regime and fundamental human rights such as the right to education health and food and the broader right to development This book will be of interest to IP scholars international relations specialists and international security analysts in particular those interested in non traditional security issues It may also serve as resource book for the international business community on developmental and human rights aspects of IP

Rethinking Intellectual Property Gustavo Ghidini, 2018 Intellectual property law is built on constitutional foundations and is underpinned by the twin freedoms of freedom of expression and freedom of economic enterprise In this thoughtful evaluation Gustavo Ghidini offers up a reconstruction of the core features of each intellectual property paradigm including patents copyright and trademarks suggesting measures for reform to allow intellectual property to become socially beneficial for all Ownership of Knowledge Dagmar Schafer, Annapurna Mamidipudi, Marius Buning, 2023-07-18 A framework for knowledge ownership that challenges the mechanisms of inequality in modern society Scholars of science technology medicine and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history or science and law Dagmar Sch fer Annapurna Mamidipudi and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership Toward this end they focus on the notions of knowledge and ownership in courtrooms workshops policy and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them Unlike scholars who have fragmented this discourse across the disciplines of anthropology sociology and history the editors highlight recent developments in the emerging field of the global history of knowledge as science as economy and as culture The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and possibilities that is how we know inevitably affects how we can own what we know and how we own always impacts how and what we are able to know Contributors Dagmar Sch fer Annapurna Mamidipudi Cynthia Brokaw Marius Buning Viren Murthy
