to discover that German identity is not a biological marker but something that could be learned performed and mastered While Germans and Austrians located their national identity in music championing composers such as Bach Beethoven and Brahms as national heroes the performance of their works by Black musicians complicated the public s understanding of who had the right to play them Audiences wavered between seeing these musicians as the rightful heirs of Austro German musical culture and dangerous outsiders to it Thurman explores the tension between the supposedly transcendental powers of classical music and the global conversations that developed about who could perform it An interdisciplinary and transatlantic history *Singing Like Germans* suggests that listening to music is not a passive experience but an active process where racial and gendered categories are constantly made and unmade
