Shape Modeling and Applications Franca Giannini,Alexander Pasko,2004-01-01 Proceedings International Conference on Shape Modeling and Applications International Conference on Shape Modeling and Applications,1999 Proceedings ,1997 *Shape Modeling International (Smi '01), 2001* Italy) International Conference on Shape Modeling and Applications (3rd : 2001 : Genoa,2000-02-01 SMI '07 ,2007 **Shape Modeling International '99** ,1999 Topological and geometric modeling implicit surfaces analyzing and transforming shapes volume modeling and applications are among the concerns of the 32 papers selected for publication The seven invited papers discuss valid versus invalid computational shape modeling computational topology for *Shape Analysis and Structuring* Leila de Floriani,Michela Spagnuolo,2007-12-24 With a lot of recent developments in the field this much needed book has come at just the right time It covers a variety of topics related to preserving and enhancing shape information at a geometric level The contributors also cover subjects that are relevant to effectively capturing the structure of a shape by identifying relevant shape components and their mutual relationships 1997 International Conference on Shape Modeling and Applications ,1997 **SMI 2005** ,2005 Proceedings, IEEE International Conference on Shape Modeling and Applications (SMI) Jun-Hai Yong,Michela Spagnuolo,Wenping Wang,2009 **IEEE International Conference on Shape Modeling and Applications 2006** ,2006-01-01 The seventh International Conference on Shape Modeling and Applications includes 20 full papers and 10 short papers written by researchers from all over the world exploring ideas and experiences related to various aspects of shape modeling and processing The papers in SMI 2006 cover shape matching and retrieval modeling with implicit surfaces and various issues of shape analysis representation and processing **IEEE International Conference on Shape Modeling and Applications 2008** Michela Spagnuolo,Daniel Cohen-Or,Xianfeng David Gu,2008 **Spectral Geometry of Shapes** Jing Hua,Zichun Zhong,Jiaxi Hu,2019-10-26 *Spectral Geometry of Shapes* presents unique shape analysis approaches based on shape spectrum in differential geometry It provides insights on how to develop geometry based methods for 3D shape analysis The book is an ideal learning resource for graduate students and researchers in computer science computer engineering and applied mathematics who have an interest in 3D shape analysis shape motion analysis image analysis medical image analysis computer vision and computer graphics Due to the rapid advancement of 3D acquisition technologies there has been a big increase in 3D shape data that requires a variety of shape analysis methods hence the need for this comprehensive resource *International Conference on Shape Modeling and Applications* International Conference on Shape Modeling and Applications,IEEE Computer Society Staff,2005 The seventh International Conference on Shape Modeling and Applications includes 30 full papers and 10 short papers written by researchers from all over the world exploring ideas and experiences related to various aspects of shape modeling and processing The papers in SMI 2005 mainly focus on shape reconstruction implicit and subdivision surfaces surface meshes and topological and physically based

modeling **Implicit Curves and Surfaces: Mathematics, Data Structures and Algorithms** Abel Gomes,Irina Voiculescu,Joaquim Jorge,Brian Wyvill,Callum Galbraith,2009-05-12 Implicit objects have gained increasing importance in geometric modeling visualisation animation and computer graphics because their geometric properties provide a good alternative to traditional parametric objects This book presents the mathematics computational methods and data structures as well as the algorithms needed to render implicit curves and surfaces and shows how implicit objects can easily describe smooth intricate and articulatable shapes and hence why they are being increasingly used in graphical applications Divided into two parts the first introduces the mathematics of implicit curves and surfaces as well as the data structures suited to store their sampled or discrete approximations and the second deals with different computational methods for sampling implicit curves and surfaces with particular reference to how these are applied to functions in 2D and 3D spaces

Geometric Modeling and Reasoning of Human-Centered Freeform Products Charlie C. L. Wang,2012-08-11 The recent trend in user customized product design requires the shape of products to be automatically adjusted according to the human body s shape so that people will feel more comfortable when wearing these products Geometric approaches can be used to design the freeform shape of products worn by people which can greatly improve the efficiency of design processes in various industries involving customized products e g garment design toy design jewel design shoe design and design of medical devices etc These products are usually composed of very complex geometric shapes represented by free form surfaces and are not driven by a parameter table but a digital human model with free form shapes or part of human bodies e g wrist foot and head models Geometric Modeling and Reasoning of Human Centered Freeform Products introduces the algorithms of human body reconstruction freeform product modeling constraining and reconstructing freeform products and shape optimization for improving the manufacturability of freeform products Based on these techniques the design automation problem for human centered freeform products can be fundamentally solved Researchers and developers working on problems of automatic designing individually customized products can use this book as a reference and it can also be used in courses in computer aided product design at the graduate level **Proceedings** ,1997-01-01

Three-Dimensional Model Analysis and Processing Faxin Yu,Zheming Lu,Hao Luo,Pinghui Wang,2011-02-03 With the increasing popularization of the Internet together with the rapid development of 3D scanning technologies and modeling tools 3D model databases have become more and more common in fields such as biology chemistry archaeology and geography People can distribute their own 3D works over the Internet search and download 3D model data and also carry out electronic trade over the Internet However some serious issues are related to this as follows 1 How to efficiently transmit and store huge 3D model data with limited bandwidth and storage capacity 2 How to prevent 3D works from being pirated and tampered with 3 How to search for the desired 3D models in huge multimedia databases This book is devoted to partially solving the above issues Compression is useful because it helps reduce the consumption of expensive resources such as hard

disk space and transmission bandwidth On the downside compressed data must be decompressed to be used and this extra processing may be detrimental to some applications 3D polygonal mesh with geometry color normal vector and texture coordinate information as a common surface representation is now heavily used in various multimedia applications such as computer games animations and simulation applications To maintain a convincing level of realism many applications require highly detailed mesh models However such complex models demand broad network bandwidth and much storage capacity to transmit and store To address these problems 3D mesh compression is essential for reducing the size of 3D model representation

View-based 3-D Object Retrieval Yue Gao,Qionghai Dai,2014-12-04 Content based 3 D object retrieval has attracted extensive attention recently and has applications in a variety of fields such as computer aided design tele medicine mobile multimedia virtual reality and entertainment The development of efficient and effective content based 3 D object retrieval techniques has enabled the use of fast 3 D reconstruction and model design Recent technical progress such as the development of camera technologies has made it possible to capture the views of 3 D objects As a result view based 3 D object retrieval has become an essential but challenging research topic View based 3 D Object Retrieval introduces and discusses the fundamental challenges in view based 3 D object retrieval proposes a collection of selected state of the art methods for accomplishing this task developed by the authors and summarizes recent achievements in view based 3 D object retrieval Part I presents an Introduction to View based 3 D Object Retrieval Part II discusses View Extraction Selection and Representation Part III provides a deep dive into View Based 3 D Object Comparison and Part IV looks at future research and developments including Big Data application and geographical location based applications Systematically introduces view based 3 D object retrieval including problem definitions and settings methodologies and benchmark testing beds Discusses several key challenges in view based 3 D object retrieval and introduces the state of the art solutions Presents the progression from general image retrieval techniques to view based 3 D object retrieval Introduces future research efforts in the areas of Big Data feature extraction and geographical location based applications
