Shapes And Things:

The Shape of Things Shawn W. Walker, 2015-12-17 Many things around us have properties that depend on their shape for example the drag characteristics of a rigid body in a flow This self contained overview of differential geometry explains how to differentiate a function in the calculus sense with respect to a shape variable This approach which is useful for understanding mathematical models containing geometric partial differential equations PDEs allows readers to obtain formulas for geometric quantities such as curvature that are clearer than those usually offered in differential geometry texts Readers will learn how to compute sensitivities with respect to geometry by developing basic calculus tools on surfaces and combining them with the calculus of variations Several applications that utilize shape derivatives and many illustrations that help build intuition are included

The Shape of Things Dayle Ann Dodds, 1994 A square is just a square until it becomes a house in this clever book A circle becomes a spinning ferris wheel and when some string and a tail are added it becomes a kite flying high in the sky With sprightly rhymes and energetic illustrations this book reveals that shapes are everywhere Full color Copyright Libri GmbH All rights reserved

The Gongsun Longzi and Other Neglected Texts Rafael Suter, Lisa Indraccolo, Wolfgang Behr, 2020-04-06 The Gongsun Longzi is often considered the only extant work of the Classical Chinese School of Names an early intellectual tradition trad dated to the 4th cent B C mainly concerned with logic and the philosophy of language The Gongsun Longzi is a heterogeneous collection of five chapters that include short treatises and largely fictive dialogues between an anonymous persuader and his opponent which typically revolve around a

paradoxical claim Its value as a testimony to Early Chinese philosophy however is somewhat controversial due to the intricate textual history of the text and our limited knowledge about its intellectual backgrounds This volume gathers contributions by leading specialists in the fields of Classical Chinese philosophy philology logic and linguistics Besides an overview of the scholarly literature on the topic and a detailed account of the reception of the text throughout time it presents fresh insights into philological and philosophical problems raised by the Gongsun Longzi and other closely related texts equally attributed to the School of Names

The Geometry of Christian Contemplation David Albertson, 2025-05-16

The writings of ancient and medieval Christian mystics were rediscovered in the twentieth century and today they are read more widely than ever before But do modern assumptions about religious experience influence how we hear those premodern voices Do we do them justice by thinking of mysticism as interior and ineffable Or can mystical experience intersect with the natural environment and indeed the cosmos which science calculates with precise quantities David Albertson's *The Geometry of Christian Contemplation* Measure without Measure suggests a fresh approach to the history of mystical theology that is oriented toward exteriority more than interiority and toward the measurable world outside more than the invisible world within The ancient Greek philosopher Plotinus had taught contemplatives to close their eyes and withdraw into the soul Most Christians followed his directions but others dissented In three critical episodes an alternative model of Christian contemplation began to emerge from Dionysius the Areopagite to the Byzantine monks John of Damascus and Theodore the Studite to eccentric humanists in medieval Paris Together these episodes add up to a very different theological aesthetics one that can enliven the modern study of mysticism and correct some of its imbalances For in the centuries before the scientific revolution and the secularization of nature Christians still saw God in the exterior world not only the interior soul God was not an ineffable and formless Absolute immeasurable as the soul but an infinite Measure who leaves behind geometrical traces in the figures of the world The God who became a human body in the Incarnation not only entered time and matter but also spatial extension and with it the conditions of measure points lines curves shapes planes dimensions and magnitudes Today the wisdom of this counter tradition can strengthen the study of mysticism not only by supplementing our contemporary fascination with negative theology by redefining what it means to name God positively but by suggesting a new connection between Christian mysticism and the hyper measured hyper technologized world that surrounds us

John Ruskin and the Ethics of Consumption David Melville Craig, 2006 The first book on the Victorian critic and public intellectual John Ruskin by a scholar of religion and ethics this work recovers both Ruskin's engaged critique of economic life and his public practice of moral imagination With its reading of Ruskin as an innovative contributor to a tradition of ethics concerned with character culture and community this book recasts established interpretations of Ruskin's place in nineteenth century literature and aesthetics challenges nostalgic diagnoses of the supposed historical loss of virtue ethics and demonstrates the limitations of any politics that eschews common purpose as vital to individual agency and social welfare Although Ruskin's moralistic efforts did not always allow for democratic individuality equality and contestation his eclecticism Craig argues helps to correct these problems Further Ruskin's interdisciplinary explorations of beauty work nature religion politics and economic value reveal the ways in which his insights into the practical connections between aesthetics and ethics and culture and character might be applied to today's debates about liberal modernity today With the triumph of global capitalism and the near silence of any opposing voice Ruskin's model of an engaged reading of culture and his public practice of moral imagination deserve renewed attention This book provides students in religion politics and social theory with a timely reintroduction to this timeless figure

Jizi and His Art in Contemporary China David Adam Brubaker, Chunchen Wang, 2015-02-12 This interdisciplinary study promotes the thesis that some contemporary Chinese ink artists succeed in using principles of traditional Chinese aesthetics to convey the union of self with nature others and the universe The investigation is a case study of the writings and paintings of Jizi an ink wash artist in Beijing who combines images of icy mountains Tibetan landscapes cosmic vistas and enclosures of personal existence Jizi's success in expressing the unification of these dimensions is confirmed by developing and applying an interpretation of Jing Hao's classic description of the authentic image which resonates with the vitality of nature To find words for resonance with visible nature the inquiry extends to such writers as Li Zehou Arthur Danto and Maurice Merleau-Ponty In short an account of authenticity in Chinese ink painting is offered experimentally as a means for assessing whether contemporary Chinese artworks are expressive of Chinese philosophy and culture The text includes stylistic comparisons with artists such as E. C. Escher Guo Xi Jia Youfu Liu Guosong Rene Magritte Piet Mondrian and Xu Bing The result is an appreciation of the healing influence of Chinese ink art in a global culture that is vibrant complex diverse and affirming of the present In this rigorous far-reaching and original analysis of contemporary ink art painting Brubaker and Wang focus our attention on the work of one independent painter Jizi whose work exemplifies an uncanny marriage between ink art and contemporary concerns In the central chapters Brubaker persuasively argues that in this work Jizi captures principles essential to traditional Chinese aesthetics articulated in terms of wholeness emptiness and visibility that enable the works to express the unification of the self with nature and the universe as

a whole It does this through forms that are innovative and part of artistic practices and discourses that are becoming increasingly global Mary Wiseman The City University of New York This important publication focuses on the evocative ink wash paintings of an artist who has over the course of decades demonstrated an unwavering commitment to exploring the technical formal philosophical and experiential dimensions of his chosen medium The essays commentaries and critical reflections collected in this volume present unique perspectives on Jizi s practice significantly contributing to the growing body of scholarship on the continuing vitality of the ink wash tradition in the global contemporary Dr Wenny Teo The Courtauld Institute of Art Through an in depth study of the ink painting practice of contemporary Chinese artist Jizi the authors discover Chinese ink painting s philosophical perspectives cosmic foundations and contemporary possibilities They also uncovered a way to enter into the artist s rich and profound spiritual world through Jiazi s expansive visual patterning and refined spiritual imagery he activates a long and great cultural tradition Yu Yang Central Academy of Fine Arts In Dark Alleys the Role Playing Game ,
