The Hand, an Organ of the Mind Zdravko Radman, 2013-05-10 Theoretical and empirical accounts of the interconnectedness between the manual and the mental suggest that the hand can be understood as a cognitive instrument Cartesian inspired dualism enforces a theoretical distinction between the motor and the cognitive and locates the mental exclusively in the head This collection focusing on the hand challenges this dichotomy offering theoretical and empirical perspectives on the interconnectedness and interdependence of the manual and mental The contributors explore the possibility that the hand far from being the merely mechanical executor of preconceived mental plans possesses its own know how enabling enhanced beings to navigate the natural social and cultural world without engaging propositional thought consciousness and deliberation The contributors consider not only broad philosophical questions ranging from the nature of embodiment enaction and the extended mind to the phenomenology of agency but also such specific issues as touching grasping gesturing sociality and simulation They show that the capacities of the hand include perception on its own and in association with other modalities action extended cognition social interaction and communication Taken together their accounts offer a handbook of cutting edge research exploring the ways that the manual shapes and reshapes the mental and creates conditions for embodied agents to act in the world Contributors Matteo Baccarini Andrew J Bremner Massimiliano L Cappuccio Andy Clark Jonathan Cole Dorothy Cowie Natalie Depraz Rosalyn Driscoll Harry Farmer Shaun Gallagher Nicholas P Holmes Daniel D Hutto Angelo Maravita Filip Mattens Richard Menary Jesse J Prinz Zdravko Radman Matthew Ratcliffe Etienne B Roesch Stephen V Shepherd Susan A J Stuart Manos Tsakiris Michael Wheeler Colors-TM Jyoti Swaroop, Geeta Oberoi, Term Book

Introspection and Consciousness Declan Smithies, Daniel Stoljar, 2012-06-12 The topic of introspection stands at the interface between questions in epistemology about the nature of self knowledge and questions in the philosophy of mind about the nature of consciousness What is the nature of introspection such that it provides us with a distinctive way of knowing about our own conscious mental states And what is the nature of consciousness such that we can know about our own conscious mental states by introspection How should we understand the relationship between consciousness and introspective self knowledge Should we explain consciousness in terms of introspective self knowledge or vice versa Until recently questions in epistemology and the philosophy of mind were pursued largely in isolation from one another This volume aims to integrate these two lines of research by bringing together fourteen new essays and one reprinted essay on the relationship between introspection self knowledge and consciousness
