Meta-Ethics Robin Attfield, 2020-10-12 This work defends an interrelated set of theses in value theory normative ethics and meta ethics The three Parts correspond to these three areas Part One Value defends a biocentric theory of moral standing and then the coherence and objectivity of belief in intrinsic value despite recent objections Intrinsic value is located in the flourishing of living creatures specifically a neo Aristotelian species relative account is supplied of wellbeing or flourishing in terms of the development of the essential capacities of one s species There follows a theory of priorities or of relative intrinsic value in which the satisfaction of basic needs takes priority over other needs and over wants and the interests of complex and sophisticated creatures over those of others where they are at stake Part Two defends a practice consequentialist theory of the criteria of rightness and of obligation which leaves room for supererogation underpins our intuitions about justice commends population growth only where it is genuinely desirable and responds better than act consequentialism to objections like that concerned with the separateness of persons Part Three sifts meta ethical theories rejects moral relativism and defends a cognitivist and naturalist meta ethic In defending analytical naturalism it takes into account the latest literature on supervenience By responding to recent discussions this study supersedes my Theory of Value and Obligation 1987 It is equipped with detailed end notes and an ample bibliography which could prove a research tool of itself **In Search of Human Nature** Carl N. Degler, 1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America s most eminent living historians He is also one of the most versatile In a forty year career he has written brilliantly on race Neither Black Nor White which won the Pulitzer Prize women s studies At Odds which Betty Friedan called a stunning book Southern history The Other South the New Deal and many other subjects Now in The Search for Human Nature Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years

The idea of a biological root to human nature was almost universally accepted at the turn of the century Degler points out then all but vanished from social thought only to reappear in the last four decades Degler traces the early history of this idea from Darwin's argument that our moral and emotional life evolved from animals just as our human shape did to William James's emphasis on instinct in human behavior then seen as a fundamental insight of psychology We also see the many applications of biology from racism sexism and Social Darwinism to the rise of intelligence testing the eugenics movement and the practice of involuntary sterilization of criminals a public policy pioneered in America which had sterilization laws 25 years before Nazi Germany one such law was upheld by Oliver Wendell Holmes's Supreme Court Degler then examines the work of those who denied any role for biology who thought culture shaped human nature a group ranging from Franz Boas Ruth Benedict and Margaret Mead to John B Watson and B F Skinner Equally important he examines the forces behind this fundamental shift in a scientific paradigm arguing that ideological reasons especially the struggle against racism and sexism in America led to this change in scientific thinking Finally Degler considers the revival of Darwinism without the Social Darwinism racism and sexism led first by ethologists such as Karl von Frisch Nikolaas Tinbergen Konrad Lorenz and Jane Goodall who revealed clear parallels between animal and human behavior and followed in varying degrees by such figures as Melvin Konner Alice Rossi Jerome Kagan and Edward O Wilson as well as others in anthropology political science sociology and economics What kind of animal is Homo sapiens and how did we come to be this way In this wide ranging history Carl Degler traces our attempts over the last century to answer these questions In doing so he has produced a volume that will fascinate anyone curious about the nature of human beings *Biopolitics and Gender* Meredith W Watts Jr, 2012-12-06 Here is an important book for social scientists interested in the influence of gender on certain types of behavior Several perspectives are presented on the general topic of biopolitics and gender including the points of view of brain science endocrinology ethology psychophysiology and such conventional interests as political attitudes socialization participation social structure and political hierarchy The varied and provocative ideas explored in this volume will broaden discussions of gender beyond an exclusive focus on sex links to oppression and discrimination *Empiricism, Explanation and Rationality* Len & Roger Doyal & Harris, 2013-04-15 Originally published in 1986 All students of social science must confront a number of important philosophical issues This introduction to the philosophy of the social sciences provides coherent answers to questions about empiricism explanation and rationality It evaluates contemporary writings on the subject which can be as difficult as they are important to understand Each chapter has an annotated bibliography to enable students to pursue the issues raised and to assess for themselves the arguments of the authors *Wittgenstein and the Cognitive Science of Religion* Robert Vinten, 2023-06-15 Advancing our understanding of one of the most influential 20th century philosophers Robert Vinten brings together an international line up of scholars to consider the relevance of Ludwig Wittgenstein's ideas to the cognitive science of religion Wittgenstein's claims ranged from the rejection of the idea that psychology is a young

science in comparison to physics to challenges to scientific and intellectualist accounts of religion in the work of past anthropologists Chapters explore whether these remarks about psychology and religion undermine the frameworks and practices of cognitive scientists of religion Employing philosophical tools as well as drawing on case studies contributions not only illuminate psychological experiments anthropological observations and neurophysiological research relevant to understanding religious phenomena they allow cognitive scientists to either heed or clarify their position in relation to Wittgenstein's objections By developing and responding to his criticisms Wittgenstein and the Cognitive Science of Religion offers novel perspectives on his philosophy in relation to religion human nature and the mind **Issues in Evolutionary**

Ethics Paul Thompson, 1995-01-13 This book explores historical and current discussions of the relevance of evolutionary theory to ethics The historical section conveys the intellectual struggle that took place within the framework of Darwinism from its inception up to the work of G C Williams W D Hamilton R D Alexander A L Trivers E O Wilson R Dawkins and others The contemporary section discusses ethics within the framework of evolutionary theory as enriched by the works of biologists such as those mentioned above The issue of whether ethical practice and ethical theory can be grounded in the theory of evolution has taken a new and significant direction within the context of sociobiology and is proving to be a challenge to previous thinking This book conveys that challenge Science and Religion John Hedley Brooke, 2014-05-15 John Hedley Brooke offers an introduction and critical guide to one of the most fascinating and enduring issues in the development of the modern world the relationship between scientific thought and religious belief It is common knowledge that in western societies there have been periods of crisis when new science has threatened established authority The trial of Galileo in 1633 and the uproar caused by Darwin's *Origin of Species* 1859 are two of the most famous examples Taking account of recent scholarship in the history of science Brooke takes a fresh look at these and similar episodes showing that science and religion have been mutually relevant in so rich a variety of ways that no simple generalizations are possible Reductionism and Cultural Being J.W. Smith, 2012-12-06 *In Defence of Science* Jack W. Grove, 1989-12-15 Science holds a central role in the modern world yet its complex interrelationships with nature technology and politics are often misunderstood or seen from a false perspective In a series of essays that make extensive use of original work by sociologists historians and philosophers of science J W Grove explores the roles and relationships of science in modern technological society Modern Science can be viewed from four related perspectives It is an expression of human curiosity a passion to understand the natural world what it is made of how it is put together and how it works It is a body of practice a set of ways of finding out that distinguish it from other realms of inquiry It is a profession a body of men and women owing allegiance to the pursuit of knowledge and for those people a career And it is a prescriptive enterprise in that the increase of scientific understanding makes it possible to put nature to use in new kinds of technology Each of these aspects of science is today the focus of critical scrutiny and often outright hostility With many examples Grove exposes the threats to science today its identification with technology its

subordination to the state the false claims made in its name and the popular intellectual forces that seek to denigrate it as a source of human understanding and progress

Being Human Roger Smith, 2007-09-11 Challenging commonly held biological religious and ethical beliefs internationally well known historian of science Roger Smith boldly argues that human nature is not some thing awaiting discovery but is active in understanding itself According to Smith being human is a self creation made possible through a reflective circle of thought and action with a past and a future and studying this history from a range of perspectives is fundamental to human self understanding Smith s argument brings together historical and contemporary debates concerning materialism and human nature and the relations of the different fields of knowledge He draws on classic writings from across the human sciences touching on sociology anthropology brain sciences history philosophical hermeneutics and critical theory and demonstrates that there is no position outside history for an absolutely objective or eternally valid view of human nature The question what is human does not have and could not possible have one answer Instead there exists a variety of answers for different purposes and there are good reasons for the many conceptions of what it is to be human Smith does not treat human nature as only biological economic or moral but as a multidimensional subject that should be considered in its proper historical context By understanding this context Smith believes we can come to a truer understanding of ourselves Persuasively and elegantly written Being Human takes an important new turn in the philosophical study of being human

Wickedness Dr Mary Midgley, Mary Midgley, 2024-11-01 To look into the darkness of the human soul is a frightening venture Here Mary Midgley does so with her customary brilliance and clarity Midgley s analysis proves that the capacity for real wickedness is an inevitable part of human nature This is not however a blanket acceptance of evil Out of this dark journey she returns with an offering to us an understanding of human nature that enhances our very humanity

A Theory of Value and Obligation Robin Attfield, 2020-07-20 Originally published in 1987 and re issued in 2020 with a new Preface this book presents and elaborates interrelated solutions to a number of problems in moral philosophy from the location of intrinsic value and the nature of a worthwhile life via the limits of obligation and the nature of justice to the status of moral utterances After developing a biocentric account of moral standing the author locates worthwhile life in the development of the generic capacities of a creature whether human or nonhuman and presents an account of relative intrinsic value which later generates a theory of interspecific justice This value theory also informs a consequentialist understanding of obligation of moral rightness and of supererogation The understanding thus supplied is shown to cope with the problems of integrity of justice and of the Repugnant Conclusion in population ethics A cognitivist account of ethical conclusions such as those so far reached is then defended against non cognitivist and relativist objections and a far reaching naturalist theory is defended integrating earlier conclusions with an account of the logic of the fundamental ethical concepts This wide ranging volume which maps the whole area of morality is thoroughly argued with reference both to contemporary philosophical developments and to classical theories

Morality Matters Roger

Trigg,2008-04-15 Morality still matters argues philosopher Roger Trigg in this accessible introduction to moral thinking Written for general readers with no background in philosophy Argues that we need a shared moral vision in order to live together both nationally and internationally Considers the need for a shared morality in relation to subjects of vital importance such as human rights Stresses that private behaviour cannot be kept separate from public choices Discusses matters of topical debate on both sides of the Atlantic **Evolutionary Theory and Human Nature** Ron

Vannelli,2012-12-06 Evolutionary Theory and Human Nature is an original highly theoretical work dealing with the transition from genes to behavior using general principles of evolution especially those of sexual selection It seeks to develop a seamless transition from genes to human motivations as bio electric brain processes emotional cognitive processes to human nature propensities various constellations of emotional cognitive forces desires and fears to species typical patterns of behavior This work covers two often antagonistic fields biology and the social sciences It should be of strong interest to anthropologists sociologists sociobiologists psychobiologists and psychologists who are interested in the question of human nature influences on social behavior Companion Encyclopedia of Theology Peter Byrne,Leslie Houlden,Rev Prof Leslie

Philosophy ,1996 **Verification in Economics and History** Omar F. Hamouda,Betsey Price,2012-11-12 Attitudes and methods derived from the hard sciences have become increasingly commonplace in the human and social sciences Whilst this

scientification process has undoubtedly fostered the growth of knowledge within history and economics these are disciplines where verification as practised in the pure sciences is not appropriate This book first published in 1991 argues constructively for a new interpretation of scientific verification within economics and history **The Bible as Rhetoric** M

Warner, 2024-10-31 First Published in 1990 The Bible as Rhetoric explores the ways in which the persuasive strategies employed in the biblical texts relate both positively and negatively to their preoccupations with religious and historical truth The book contains pioneering interdisciplinary papers that clarify what is at issue in the apparently competing claims that the Bible should be read as literature and as scripture Uniquely the volume brings together philosophers literary critics biblical scholars theologians and historians of ideas who combine the best biblical and historical scholarship with a range of contemporary approaches to the study of texts from the deconstructive and the feminist through the Wittgensteinian to those of the heirs of the tradition of practical criticism The volume is of importance both to those interested in the applications of contemporary literary theory and to all those concerned with the relation between religious and secular readings of the Bible
