Shaping the City Roger K. Lewis, 1987 **Shaping the City** Roger K. Lewis, 1987 **Shaping the City** Gregory F. Gilmartin, 1996-10 The Municipal Art Society was founded in New York City in the wake of the World's Columbian Exposition when the Great White City in Chicago ushered in a new conception of what American cities could achieve through coordinated planning and the collaboration of the nation's best classical architects and artists In 1890s New York much of the population lived in apartments that had no toilets developers considered it their inalienable right to build a skyscraper on a twenty foot lot and graft not need determined the city government's construction priorities If this situation has changed we owe it less to the councilmen and mayors who enacted legislation than to the citizen activists who persuaded them to do so *Shaping the City* is a stirring account of a century of just such citizen activism not a dry institutional history but the inside story of city government as it affects the physical environment We know of MAS today as the organization that led the fight against overdevelopment at Columbus Circle and the battle to retain the honky tonk character of Times Square but in its early days MAS was the guiding force behind the City Beautiful movement Its members built the city's great classical ensembles and they ushered in a golden age of municipal architecture with their designs for bridges park pavilions monuments even lamp posts MAS was among the first organizations to demand the introduction of zoning to New York It also pioneered the concept of community planning and undertook the seemingly hopeless task of protecting landmarks persuading Mayor Robert F Wagner to sign the Landmarks Preservation Law a model for the rest of the nation In these pages Gregory F Gilmartin has looked beyond the narrow scope of architectural history and focuses instead on the people policies and politics that shape the cityscape He is frank in his portrayal of politicians and dirty tricks and encouraging in his portraits of citizens and programs that have made a difference *Shaping the City* is addressed not only to those who are specifically interested in architecture art history parks preservation and urban history but also to the more general reader who loves cities but is disturbed by the destruction of neighborhoods and the overwhelming scale of new developments The book is especially valuable as a

demonstration that the political process can be made to work for the public interest The result is not nostalgia but will convince readers that they as the Municipal Art Society has done and continues to do can participate shaping the agenda for the future

Business Improvement Districts and the Shape of American Cities Jerry Mitchell,2009-01-01 Jerry Mitchell provides a comprehensive analysis of business improvement districts BIDs public private partnerships that shape city places into enticing destinations for people to work live and have fun Responsible for the revitalization of New York s Times Square and

Seattle's Pioneer Square BIDs operate in large cities and small towns throughout the United States Mitchell examines the reasons for their emergence the ways they are organized and financed the types of services they provide their performance their advantages and disadvantages and their future prospects **Urban Engineering** Ariva Sugandi Permana, 2025-09-30 Urban engineers provide a physical definition of the urban habitat by planning designing building and constructing operating and maintaining infrastructure applying the tools of engineering science and good management to address the complex problems associated with infrastructure services buildings environment and land use generally encountered in cities Urban Engineering serves as a textbook to support a range of undergraduate courses in civil and environmental engineering urban planning and related areas It is broad and inclusive and takes a modular approach where each theme is discussed comprehensively from the macro to the micro level Highlights include urban design housing wastewater systems transportation systems smart cities and urban agriculture The textbook has a particular emphasis on engineering solutions in sustainability **Public City** Beau B Beza, Brendan Gleeson, 2014-11-25 Paul Mees urban ideal counted on watchful confident and well informed citizenry to work collectively in a quest for fair and just cities As such The Public City is largely a critique of neo liberalism and its arguably negative influence on urban prospects As Mees explained it neo liberal urbanism was much more than a political aberration it was a threat that imposed many costly failures in an age overshadowed by grave ecological challenges Fifteen of Australia and New Zealand's leading urban scholars including Professor Emeritus Jean Hillier and Professor Brendan Gleeson have contributed to this collection The Public City includes a foreword by the late Professor Sir Peter Hall a world leader in urban planning from Britain Kenneth Davidson one of Australia's top economic columnists has also contributed a chapter The collective works in this book extend beyond an analysis of urban patterns to provide a blueprint for the improvement of civic and institutional purpose in the creation of the public city **The Evening Star** Faye Haskins, 2019-09-11 The Evening Star The Rise and Fall of a Great Washington Newspaper is the story of the 129 year history of one of the preeminent newspapers in journalism history when city newspapers across the country were at the height of their power and influence The Star was the most financially successful newspaper in the Capital and among the top ten in the country until its decline in the 1970s The paper began in 1852 when the capital city was a backwater southern town The Star's success over the next century was due to its singular devotion to local news its many respected journalists and the historic times in which it was published The book provides a unique perspective on more than a century of local national and international history The book also exposes the complex reasons for the Star's rise and fall from dominance in Washington's newspaper market The Noyes and Kauffmann families who owned and operated the Star for a century play an important role in that story Patriarch Crosby Noyes life and legacy is the most fascinating a classic Horatio Alger story of the illegitimate son of a Maine farmer who by the time of his death was a respected newspaper publisher and member of Washington's influential elite In 1974 his descendants sold the once great newspaper Noyes built to Joseph Allbritton

Allbritton and then Time Inc tried to save the Star but failed **The Transformation of Cities** David C. Thorns,2017-03-14
The aim of the book is to examine the transformation of the city in the late 20th century and explore the ways in which city life is structured The shift from modern industrial to information consumption based post modern cities is traced through the text The focus is not just on America and Europe but also explores cities in other parts of the world as city growth in the twenty first century will be predominantly outside of these regions **Cities, State and Globalisation** Tassilo Herrschel,2014-01-03 This book investigates the ways in which city regions view themselves as single entities how they are governed what is meant by governance why the question of city regional governance matters and the extent to which the balance between internal and external factors is important for finding governance solutions Examples from North America and Europe are compared and contrasted to gain a better understanding of what matters on the ground to people and policy makers when seeking answers to the challenges of a globalised rapidly changing world In order to analyse the conditions involved in making local decisions the author looks at the impact of established policy making practices socio economic patterns among the population existing views of the local and the regional and their respective roles among the electorate and policy makers and the scope for building city regional governance under given statutory and fiscal provisions The complex interaction of these factors is shown to produce place specific forms and modi operandi for governing city regions as local regional constructs This book will be of interest to urban and regional policy makers and scholars working in the fields of economic geography and political geography **City and Regime in the American Republic** Stephen L. Elkin,2015-05-14 Stephen L Elkin deftly combines the empirical and normative strands of political science to make a powerfully original statement about what cities are can and should be Rejecting the idea that two goals of city politics equality and efficiency are opposed to one another Elkin argues that a commercial republic could achieve both He then takes the unusual step of addressing how the political institutions of the city can help to form the kind of citizenry such a republic needs The present workings of American urban political institutions are Elkin maintains characterized by a close relationship between politicians and businessmen a relationship that promotes neither political equality nor effective social problem solving Elkin pays particular attention to the issue of land use in his analysis of these failures of popular control in traditional city politics Urban political institutions however are not just instruments for the dispensing of valued outcomes or devices for social problem solving they help to form the citizenry Our present institutions largely define citizens as interest group adversaries and do little to encourage them to focus on the commercial public interest of the city Elkin concludes by proposing new institutional arrangements that would be better able to harness the self interested behavior of individuals for the common good of a commercial republic Journal of the Board of Education of the City of New York New York (N.Y.). Board of Education,1909 **Annual Report** USA Patent Office,1903 **The Largest Art** Brent D. Ryan,2017-11-03 Why urban design is larger than architecture the foundational qualities of urban design examples and practitioners Urban design

in practice is incremental but architects imagine it as scaled up architecture large ready to build pop up cities This paradox of urban design is rarely addressed indeed urban design as a discipline lacks a theoretical foundation In *The Largest Art* Brent Ryan argues that urban design encompasses more than architecture and he provides a foundational theory of urban design beyond the architectural scale In a declaration of independence for urban design Ryan describes urban design as the largest of the building arts with qualities of its own Ryan distinguishes urban design from its sister arts by its pluralism plural scale ranging from an alleyway to a region plural time because it is deeply enmeshed in both history and the present plural property with many owners plural agents with many makers and plural form with a distributed quality that allows it to coexist with diverse elements of the city Ryan looks at three well known urban design projects through the lens of pluralism a Brancusi sculptural ensemble in Romania a Bronx housing project and a formally and spatially diverse grouping of projects in Ljubljana Slovenia He revisits the thought of three plural urbanists working between 1960 and 1980 David Crane Edmund Bacon and Kevin Lynch And he tells three design stories for the future imaginary scenarios of plural urbanism in locations around the world Ryan concludes his manifesto with three signal considerations urban designers must acknowledge eternal change inevitable incompleteness and flexible fidelity Cities are ceaselessly active perpetually changing It is the urban designer's task to make art with aesthetic qualities that can survive perpetual change **Toward the Healthy City** Jason Corburn, 2009 A call to reconnect the fields of urban planning and public health that offers a new decision making framework for healthy city planning Cincinnati, the Queen City, 1788-1912 Charles Frederic Goss, 1912
