Shaping Of Urban Britain In The Nineteenth And Twentieth Centuries:

Cities and Plans Gordon Emanuel Cherry, 1988-01-01 An account of urban planning in Britain between 1830 and 1980 with emphasis on the increasing role of government The book describes the steps taken in public sector regulation of the urban environment from by laws to town planning and sets them in the context of societal change

Urban Politics and Space in the Nineteenth and Twentieth Centuries Barry M. Doyle, 2009-10-02 This book addresses the increasing regionalisation of urban governance and politics in an era of industrialisation suburbanisation and welfare extension It provides an important reassessment of the role structure and activities of urban elites highlighting their vitality and their interdependence and demonstrating the increasing regionalisation of municipal politics as towns sought to promote themselves extend services and even expand physically onto a regional level Moreover it explores the discourses surrounding space in which gender class morality and community all feature prominently How urban space and its uses were defined and redefined became key political weapons across the regions of England in the nineteenth century and these chapters show how a range of sources maps poems songs paintings illustrated journalism social investigations historical texts were employed by contemporaries to shape the urban and its image often by placing it in a regional context or contributing to the creation of a regional image and identity This collection illustrates the continuing vitality of the study of urban politics and governance and presents a rare attempt to place English urban history in a regional context Barry Doyle has assembled an impressive team of experts on urban politics to examine not just party politics but the wider machinery of government the boards agencies and committees that shaped British towns and cities after 1830 Space and place were contested and negotiated and a distinctive sense of local identity emerged In so doing the collection challenges some of the generalisations about the governance of urban Britain and reminds us that despite a shrinking globe the local and regional are crucial to our everyday lives The book should be read by all interested in and especially those working for local government Professor Richard Rodger University of Edinburgh In *Urban Politics and Urban Space in the Nineteenth and Twentieth Centuries: Regional Perspectives* Barry Doyle brings together nine original essays by both established and younger authors to explore three inter related themes in urban history politics space and region from the early to mid nineteenth century to the mid twentieth century The book is conveniently divided into three sections dealing with structures of politics politics institutions and urban management and governance discourses and space Each of the contributions to this volume promises to both enrich our knowledge of specific moments in British politico urban development through the study of discrete developments in time and space and to open up and extend the debate on the British variant of urban modernity Each examines the ways in which local power space and regional relations developed and changed between the early nineteenth and mid twentieth century Localities their politics and communal identities are never really far from a national context indeed they largely shaped it as these essays make clear Doyle is to be commended for his endeavour not just as the editor but in particular for

his introduction to the volume In a richly referenced essay that comes in at just over seven and half thousand words he casts a panoramic view over the field in the last few decades making connections where few contemporary urban historians care to tread Doyle gives us a forceful challenge to what he sees as a particularly English malaise in this period namely that of failing to recognise the potential of regional and local government to shape and manage the major reallocation of space and power a vital sphere of public life that is contemporary to our own times It is a masterly and well informed piece of writing that will set the standard for some years to come Professor Anthony McElligott University of Limerick

The Cambridge Urban History of Britain Peter Clark, David Michael Palliser, Martin J. Daunton, 2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century *Britain 1740 - 1950* Richard Lawton, Colin Pooley, 2021-12-02 Originally published in 1992 this book provides students with a well illustrated clearly written text which offers a coherent overview of Britain's development from a pre modern to a modern economy and society The key processes that have shaped the geography of modern Britain are rooted in the significant demographic economic technological and social transitions of the early eighteenth century the impact of which was not fully diffused through the nation until the mid 20th Century This country wide survey examines the nature of this transformation The material in the book is accessible because the book is clearly structured into 3 phases 1740 to the 1830s the 1830s to the 1890s and the 1890s to 1950 For each period the principal aspects of change in population industry the countryside and urban life are examined and regional examples given to support the analysis

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
