Shared Beginnings Divergent Lives:

Shared Beginnings, Divergent Lives John H. Laub, Robert J. Sampson, 2006-03-31 This book arguably the longest longitudinal study of age crime and the life course to date analyzes data on crime and social development up to age 70 for 500 men who were remanded to reform school in the 1940s The authors find that men who desisted from crime were rooted in structural routines and had strong social ties to family and community **Shared Beginnings, Divergent Lives** John H. LAUB, Robert J. Sampson, 2009-06-30 This book analyzes newly collected data on crime and social development up to age 70 for 500 men who were remanded to reform school in the 1940s Born in Boston in the late 1920s and early 1930s these men were the subjects of the classic study Unraveling Juvenile Delinguency by Sheldon and Eleanor Glueck 1950 Updating their lives at the close of the twentieth century and connecting their adult experiences to childhood this book is arguably the longest longitudinal study of age crime and the life course to date John Laub and Robert Sampson's long term data combined with in depth interviews defy the conventional wisdom that links individual traits such as poor verbal skills limited self control and difficult temperament to long term trajectories of offending The authors reject the idea of categorizing offenders to reveal etiologies of offending rather they connect variability in behavior to social context They find that men who desisted from crime were rooted in structural routines and had strong social ties to family and community By uniting life history narratives with rigorous data analysis the authors shed new light on long term trajectories of crime and current policies of crime control Table of Contents Acknowledgments 1 Diverging Pathways of Troubled Boys 2 Persistence or Desistance 3 Explaining the Life Course of Crime 4 Finding the Men 5 Long Term Trajectories of Crime 6 Why Some Offenders Stop 7 Why Some Offenders Persist 8 Zigzag Criminal Careers 9 Modeling Change in Crime 10 Rethinking Lives in and out of Crime Notes References Index The accounts of individuals are quite riveting and the book can be recommended strongly purely for the stories provided about diverse lives However the book is much much more than that in terms of the serious challenge that the authors findings and ideas present to some of the leading contemporary theories of both crime and development A highly original and scholarly contribution of the highest quality Sir Michael Rutter Institute of Psychiatry King s College London ttitleShared Beginnings Divergent Lives is an extraordinary work which shows the deep insights gained by studying the whole life course beginning in childhood and ending in later life With access to a rare data archive the authors provide compelling evidence on the remarkably varied adult lives of teenage delinquents who grew up in low income areas of Boston born 1925 1935 The story behind these varied life paths and their consequences inspires fresh thinking about crime over the life course through models of life trajectories and vivid narratives that reveal the complexity of lives Glen H Elder Jr University of North Carolina at Chapel Hill This book redraws the landscape of developmental criminology that Laub and Sampson already have done so much to define setting new standards and benchmarks along the way The authors both provide new evidence for earlier conclusions and challenge prevailing assumptions and assertions thereby reshaping the

criminological research agenda for years to come John Hagan Northwestern University The Explanation of Crime Per-Olof H. Wikström, Robert J. Sampson, 2006-11-30 Integration of disciplines theories and research orientations has assumed a central role in criminological discourse yet it remains difficult to identify any concrete discoveries or significant breakthroughs for which integration has been responsible Concentrating on three key concepts context mechanisms and development this volume aims to advance integrated scientific knowledge on crime causation by bringing together different scholarly approaches Through an analysis of the roles of behavioural contexts and individual differences in crime causation The Explanation of Crime seeks to provide a unified and focused approach to the integration of knowledge Chapter topics range from individual genetics to family environments and from ecological behaviour settings to the macro level context of communities and social systems. This is a comprehensive treatment of the problem of crime causation that will appeal to graduate students and researchers in criminology and be of great interest to policy makers and practitioners in crime policy and prevention Criminal Theory Profiles Joshua D. Behl, Leonard A. Steverson, 2021-09-23 This book brings to life the major theories of crime and deviance by presenting detailed profiles that help readers differentiate each theory and its major propositions by better understanding how when and by whom the theory was formed Criminology is based on strong theoretical foundations that attempt to answer the question of why people commit crime Criminological theory is especially complex in that theorists come from a variety of disciplines including medicine sociology psychology economics and law While not an exhaustive list of each theorist s works nor an in depth review of the empirical work that has been done on each theory this text tracks the intellectual development of a theory by profiling the theorists who are responsible for the major ideas in criminological thought By viewing the field in the context of the social conditions of the time and the personal histories of the theorists students can better understand the intellectual history of each theory and the relationship between criminology and other fields to grasp a better appreciation of how the science of crime and the study of criminals has evolved All chapters are organized with a brief overview of the theorist and their significant ideas a biographical profile of the theorist coverage of the theoretical developments and contributions of the theorist a list of major works by the theorist and a summary detailing the overall legacy of the theorist in the field This book is ideal for courses on criminology criminological theory and criminal behavior **Confirmation Hearings on Federal Appointments** United States. Congress. Senate. The Origins of American Criminology Francis T. Cullen, Cheryl Lero Jonson, Andrew J. Committee on the Judiciary, 2010 Myer, Freda Adler, 2011 The essays contained in this book capture the stories behind the invention of criminology s major theoretical perspectives and preserves information from the generation that defined the field for the past decades that otherwise would have been lost This history shows criminology to be a human enterprise Its ideas were not driven primarily by data nor were the theories invented solely as part of the scientific process To the contrary American criminology s great theories most often preceded the collection of data they guided and produced empirical inquiry not vice versa This volume

demonstrates that humanity is what makes theory possible in that diverse experiences allow individual scholars to see the world differently and thus shape theoretical paradigms based on their own unique life stories **Developmental Origins** of Aggression Richard Ernest Tremblay, Willard W. Hartup, John Archer, 2005-03-15 Offering the first comprehensive analysis of this topic in over 30 years this book is sure to fuel discussion and debate among researchers practitioners and students in developmental psychology child clinical psychology child and adolescent psychiatry criminology and related disciplines In the classroom it is a unique and valuable text for graduate level courses BOOK JACKET and Life-course Criminological Theories Paul Mazerolle, 2017-07-05 The developmental and life course perspective in criminology came to prominence during the late 1980s and throughout the 1990s a number of theories were developed to explain offending behavior over the life course This volume brings together theoretical statements empirical tests and debates of these major theories within the developmental and life course criminology perspective. In the first section of the book original theoretical statements are provided and this is followed by a section which includes empirical tests of each of these theories conducted by researchers other than the original theorists The final section of the book provides a summary of the major debates both within the developmental and life course perspective and also between this perspective and others within criminology This comprehensive volume provides an informative overview of the developmental and life course perspective in criminology Forensic Psychology Graham M. Davies, Anthony R. Beech, 2017-10-23 Introduces forensic psychology to students and professionals who want to better understand psychology s expanding influence on the study of law crime and criminality Forensic psychology is a constantly growing discipline both in terms of student interest and as a profession for graduates This book highlights the often sizeable gap between media myths surrounding forensic practice and reality Editors Graham Davies and Anthony Beech present an exciting and broad range of topics within the field including detailed treatments of the causes of crime investigative methods the trial process and interventions with different types of offenders and offences Forensic Psychology Crime Justice Law Interventions Third Edition covers every aspect of forensic psychology from understanding criminal behaviour to applying psychological theory to criminal investigation analysing the legal process and the treatment of witnesses and offenders Each chapter has been thoroughly revised and updated with the latest findings The book also includes two entirely new chapters one on psychopathy and crime the other on female offenders Drawing on a wealth of experience from leading researchers and practitioners this new edition will interest and enthuse today s generation of students All chapters thoroughly revised and updated Features two brand new chapters Supplemented by additional online resource materials including related links multiple choice questions and PowerPoint slides Authored by a wide range of experienced forensic psychology professionals Forensic Psychology Third Edition is essential reading for undergraduates first encounter with the subject area and is an excellent introduction for more specialised postgraduate Encyclopedia of Criminological Theory Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The courses

level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Tocock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a guick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to quide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory **Cultures of Desistance** Adam Calverley, 2013 In contrast to the widespread focus on ethnicity in relation to engagement in offending the question of whether or not processes associated with desistance that is the cessation and curtailment of offending behaviour vary by ethnicity has received less attention This is despite known ethnic differences in factors identified as affecting disengagement from offending such as employment place of residence religious affiliation and family structure providing good reasons for believing differences would exist This book seeks to address this oversight Using data obtained from in depth qualitative interviews it investigates the processes associated with desistance from crime among offenders drawn from some of the principal minority ethnic groups in the United Kingdom Cultures of Desistance explores how structural families friends peer groups employment social capital and cultural religion values recognition ethnic differences affected the environment in which their desistance took place For Indians and Bangladeshis desistance was characterised as a collective experience involving their families actively intervening in their lives In contrast Black and dual heritage offenders desistance was a much more individualistic endeavour The book suggests a need for a research agenda and justice policy that are sensitive to desisters structural location and for awider culturewhich promotes and supports desisters efforts Rethinking Case Study Research Lesley Bartlett, Frances Vavrus, 2016-11-10 Comparative case studies are an effective qualitative tool for researching the impact of policy and practice in various fields of social research including education Developed in response to the inadequacy of traditional case study approaches comparative case studies are highly effective because of their ability

to synthesize information across time and space In Rethinking Case Study Research A Comparative Approach the authors describe explain and illustrate the horizontal vertical and transversal axes of comparative case studies in order to help readers develop their own comparative case study research designs In six concise chapters two experts employ geographically distinct case studies from Tanzania to Guatemala to the U S to show how this innovative approach applies to the operation of policy and practice across multiple social fields With examples and activities from anthropology development studies and policy studies this volume is written for researchers especially graduate students in the fields of education and the interpretive social sciences **Integrated Developmental and Life-course Theories of Offending David P.** Farrington, 2017-07-05 Developmental and life course criminology aims to provide information about how offending and antisocial behavior develops about risk and protective factors at different ages and about the effects of life events on the course of development This volume advances knowledge about these theories of offender behavior many of which have been formulated only in the last twenty years It also integrates knowledge about individual family peer school neighborhood community and situational influences on offender behavior and combines key elements of earlier theories such as strain social learning differential association and control theory Contributors Benjamin B Lahey and Irwin D Waldman focus on antisocial propensity and the importance of biological and individual factors Alex R Piquero and Terrie E Moffitt distinguish between life course persistent and adolescent limited offenders David P Farrington presents the Integrated Cognitive Antisocial Potential ICAP theory which distinguishes between long term and short term influences on antisocial potential Richard F Catalano J David Hawkins and their colleagues test the Social Development Model SDM Marc Le Blanc proposes an integrated multi layered control theory in which criminal behavior depends on bonding to society psychological development modeling and constraints Robert I Sampson and John H Laub hypothesize that offending is inhibited by the strength of bonding to family peers schools and later adult social institutions such as marriage and jobs Terence P Thornberry and Marvin D Krohn propose an interactional theory of antisocial behavior Per Olof H Witkstrom's developmental ecological action theory emphasizes the importance of situational factors opportunities cause temptation friction produces provocation and monitoring and the risk of sanctions have deterrent effects The Logic of Violence Brendan Marsh, 2019-08-30 Violence is widely associated with illegal drug markets and is one of the features that can differentiate illegal capitalism from legitimate business This book explores the perceived causes and functions of violence in an illegal drug market in Dublin City Ireland Understanding why violence occurs amongst participants in illegal drug markets is an ongoing part of the criminological endeavour Scholars debate the various business and personal factors that contribute towards violent perpetration Complex aspects of participants lives such as addictive disorders socioeconomic status and socialisation add further complexity This book examines violence in an illegal drug market from the perspectives of those who had participated in it that is formerly addicted people as well as former profit oriented drug dealers. stereotypes MacLeod's return eight years later and the resulting 1995 revision revealed little improvement in the lives of these men as they struggled in the labor market and crime ridden underground economy. The third edition of this classic ethnography of social reproduction brings the story of inequality and social mobility into today s dialogue Now fully updated with thirteen new interviews from the original Hallway Hangers and Brothers as well as new theoretical analysis and comparison to the original conclusions Ain t No Makin It remains an admired and invaluable text Existential Social Work Practice Mark Griffiths, 2017-08-29 Social work is being constantly shaped by external forces such as new information technology managerialism increased public accountability and programme risk management Although an appreciation of how these forces impact on direct service is required an exclusive focus on them can prevent social workers from genuinely embracing current practice opportunities Existentialism a philosophy that emphasises our existence in the world as free and responsible agents helping to shape our own experiences through the choices we make has influenced the development of social work almost from its origins This ground breaking text highlights social work s existential heritage and the existential threats and challenges to current social work practice and explores how existential philosophy can help direct service social workers find purpose and meaning in their daily practice in a radically uncertain and alienated twenty first century world This is a fascinating read from one of the leading scholars in existentialist social work and an essential guide for today s student and practitioner in the application of existential social work practice The Craft of Life Course Research Glen H.
