Love Robert C. Solomon,2010-12-08 Love our hearts yearn for it we fall into it or out of it we ll do almost anything to attain and keep it Those who have experienced the power of love whirl from its embrace It is delicious anguish gut wrenching pain and intoxicating allure Nations go to war over it crimes are committed to satisfy its demands lives are often ruined because of it and extraordinary feats of courage and sacrifice are performed in its name But beyond the cliches and greeting card platitudes do we really understand what love is and how it alters the way we think feel and behave Should love be viewed as little more than a lusty romp or is there more to it What is the relationship between love and romance caring concern compassion thoughtfulness sex and the many other components that our society jumbles together in this potent potpourri whose power can give strength to the weakest among us or turn powerhouses of strength into emotional mush It is precisely because love is such an important part of our lives that we owe it to ourselves to reach beyond overwhelming passion and the roadblocks of illusion to achieve real understanding of this extraordinary human phenomenon It won t always be easy in fact it s sometimes quite painful But the rewards are many for those who will risk exploring their own cherished attitudes about a subject that has held us in its grip for centuries and shows no signs of letting go Some of the topics covered are What I Feel in My Heart On the Alleged Origins of Romantic Love What Do I Want When I Want You Why Do I Love You The Importance of Being Honest Love Sex and Intimacy Beyond Sex and Gender What s So Good About Love

**From Research to Clinical Practice** George Stricker,Robert H. Keisner,2013-11-11 It is an intriguing feature of human experience that in our present world amid thousands of indications of the effectiveness of the scientific method so many of us persist in demonstrably illusory or magical beliefs whether religiously related or simply reflections of long standing superstitions At a time when millions can observe on television the first landings of human beings on the moon when our daily lives in the so called developed countries are replete with conveniences that reflect scientific advances we still persist in daily wagers on the state lotteries in paying astrologers or palmists for their readings in investing thousands of dollars and hours of our legislators time in discussing such issues as the value of daily prayer in the elementary schools The emergence of modern medicine based increasingly on scientific research in chemistry biology and physics has considerably reduced people's resort to shamans and witch doctors within the major sectors of our own society although it has by no means eliminated such practitioners

**Eating Disorders and Marital**

**Relationships** Jan Norre, Stephan Van den Broucke, Walter Vandereycken, 2006-04-19 Anorexia and bulimia are on the increase in the Western world and the disease is now recognised to no longer be only a problem for teenage girls but older women as well. Most older women either do now or did previously live with a partner and much attention has been paid to these relationships in devising therapeutic regimes. *Eating Disorders and Marital Relationships* takes a critical look at the evidence behind the assumption of psychiatric illness in the patients and their partners and comes up with some surprising results. Van den Broucke, Vandereycken and Norre carefully describe both the theoretical and practical implications of their work making this book important reading for both practitioner and researcher. *Handbook of Gender Research in Psychology*

Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R. McCreary and Joan C. Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the field of psychology and they have been conducted in every sub-field of the discipline. There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent. First, social psychological studies of person perception show that sex is especially salient in social groups. It is the first thing people notice about others and it is one of the things we remember best. Fiske, Haslam, Stangor, Lynch, Duan, Glass, 1992. For example, people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man. Second, many people hold firm beliefs that aspects of physiology suit men and women for particular social roles. Men's greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders, i.e. people we look up to. Women's reproductive capacity and the caretaking tasks, e.g. breastfeeding, baby minding, that accompany it make them seem suitable for other roles that require gentleness and nurturance. Third, the logic that underlies hypothesis testing in the sciences is focused on difference. Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ.

**Youth, AIDS and Sexually Transmitted Diseases** Anne Mitchell, Susan Moore, Doreen Rosenthal, 2020-03-25 What has been the impact of AIDS and sexually transmitted diseases on the lives of young people? *Youth AIDS and Sexually Transmitted Diseases* provides a comprehensive overview of research and policy in this increasingly important area. The book describes the world-wide incidence and prevalence of sexually transmitted diseases among adolescents and examines how their sexual behaviour has changed as a result of the threat of AIDS. It also looks at young people's knowledge and attitudes about their own sexual health as well as the usefulness of models in predicting those at risk. The authors also discuss the effectiveness of institutional policies in educating young people and in preventing sexually transmitted diseases. *Youth AIDS and Sexually Transmitted Diseases* will be of considerable benefit to health care providers, sex educators and all those who work with and study adolescents.
