Sharks Still Don't Get Cancer I. William Lane, Linda Comac, 1996 As events and research continue to unfold shark cartilage may prove to be the first major step toward preventing and conquering cancer Benefits of shark cartilage as healing agent

In the Name of Sharks François Sarano, 2023-10-17 Twenty metres below water the oceanographer François Sarano came face to face with a five and a half metre great white shark Seduced by the gentle elegance of this majestic creature Sarano experienced a profound sense of affinity with her as they swam side by side shoulder to shoulder eye to eye cutting a single figure through the ocean depths It was an experience which made him realize the depth of our ignorance of the lives of sharks leading him to become a passionate advocate for their protection Drawing on the latest scientific research on the biology and ethology of sharks and their exceptional characteristics this book aims to break through the barrier of prejudice and to pay homage to their true nature Representing a last vestige of wilderness their populations are nevertheless under threat like so many species they have been hunted and exploited by humans Sarano argues for a change of mindset in which we lose ourselves in the world of the other so that each living entity human and non human can take their rightful place in the broader global ecosystem Also available as an audiobook
