danger he has faced and the spectacular sights he has seen in the world's largest environment. The book includes 16 pages of black and white photographs. A Perfect Planet Huw Cordey, 2020-11-26. There is no place like home. The conditions of Earth are not just good for life; they are perfect. Everything about our planet—its size, its distance from the Sun, its spin and tilt, its moon—is perfectly suited to our existence, and our planet's forces serve to nurture its spectacular biodiversity. A Perfect Planet shows in stunning detail how Earth has always been more than the sum of its parts. Unlike any other astronomical body, it is a living world. Focusing on four key natural forces—global weather systems distributing fresh water to all corners, marine currents delivering nutrients to the deepest reaches of the ocean, solar energy warming and electrifying everything it touches, and volcanic activity fertilising the earth's surface—Huw Cordey reveals to us new levels of this living world: a place populated with astonishing characters living remarkable lives. From Arctic wolves prowling moonlit landscapes or wood frogs frozen in winter and magically thawing back to life, to flamingos flying thousands of miles to a vast volcanic lake in Africa to breed, we see time and again how animals are perfectly adapted to whatever the environment throws at them. Packed with over 250 full-colour images and including a foreword by Alastair Fothergill and stills from the BBC series, spectacular footage. A Perfect Planet is a stunning exploration of life on Earth, life that is increasingly precious and rare. The Guide's Guide to Guiding Garth Thompson, 2007-01-22. Aimed at informing and educating on wildlife guiding in Africa's many diverse parks and safari areas, this resource provides aspiring navigators with complete information on the necessary qualifications and requirements to gain access to this growing field. A wide range of subjects are expertly explored, including guiding principles and camp etiquette, medical supplies and safety tips, and details on the use of common field tools such as rifles, handguns, cameras, and binoculars. Real-life stories blend with artful cartoons that add humor while emphasizing pertinent points to round out this must-have reference for those looking for a career in guiding. Encyclopedia Of The Aquatic World, 2004. Contains indexes for the encyclopedia of the aquatic world. Shark Mark Carwardine, 2004. A richly illustrated reference. Sharks are awe-inspiring, beautiful, mysterious, and frightening. However perceived, they never fail to excite and impress. They predate the dinosaurs and have ruled the seas for 400 million years. Shark presents the facts and explores the fallacies about these nearly perfectly adapted fish from their prehistoric beginning to their struggle for survival today. The book covers their origins and ancestors, diversity of the species, shark behavior and physiology, research projects, face-to-face encounters, conservation efforts. A detailed chapter on shark attacks explains where, when, and why attacks occur. The book also describes the different types of attacks: hit and run, bump and bite, and sneak attacks, and provides useful tips for not becoming a statistic. Engagingly written and illustrated with stunning photographs, Shark combines the latest scientific findings and celebrates the mystery and diversity of a remarkable species.
