The Power of Babies Daniel Rousseau, 2023-07-04 We follow the journey of Melanie Lorenzo Fiona Eric babies observed day by day from birth and for several months or years in the construction of their relationship with the world with their parents and with their surroundings What do they show us The astonishing capacities of the baby to connect to the brain of another human to nestle in it like a small psychic marsupial after having scanned in its environment the best available affective Wi Fi terminal Not necessarily its father or mother if they do not meet its criteria of absolute requirement as regards quality and safety of the emotional connection that is available Melanie from the fourth day of life chose to renounce her parents who were unable to pay attention to her and asked for help from the professionals of the maternity hospital and then of the nursery where she was placed after a dramatic episode of psychological coma During the first year of her life in order to escape the insecurity generated by her parents Melanie fell asleep as soon as they want to carry her but woke up as if by magic as soon as she was in other safer even unknown arms Lorenzo barely two weeks old cried during a consultation and quickly calmed down in the arms of a nursery nurse while his mother admitted that she could never calm him down at home For the next two weeks his crying quickly subsided because in order not to be mistreated by his father who was exasperated by his cries Lorenzo had learned to cry quietly Placed in an institution at the age of one month he was a very gentle baby shying away from relationships silent but he changed completely when he found himself facing his father who had shaken him His whole body stiffened and he stared at his father with a hypnotic and worrying look It would be several weeks before he re-established quality Wi Fi connections with his mothering Eric was not lucky enough to be separated early enough from his parents who abandoned him in his bed deprived of emotional and sensory life deprived of Wi Fi Removed from his family at the age of three he was a little boy who lost interest in humans but was fascinated by beeps the fridge lamp toy batteries electric buttons He became an electronic baby looped disconnected from the web of humans These stories tell us how babies from birth have this skill to test by themselves the quality of the connections of the human network that surrounds them and to choose their first emotional attachments according to the quality of the signals received in return without worrying about their filiation or their biological reality A shock They reveal to us through this unheard of skill what is human in a person and how the little person becomes human A new and modern vision of the human baby These babies show us the intense efforts they make from the moment they are born to relate and to be kind to make themselves light in the arms that carry them to exist in the brains they cram into to ensure their safety and to download the knowledge of

the world they need to survive Babies very actively adapt to their new life as earthlings through the Wi Fi connections they make in the first few minutes of their lives The author concludes his book with a call to consider the reality of the psychic suffering of abused babies Twenty five years ago the medical world finally discovered that babies could feel physical pain which has since been recognized and treated Before that they were operated on without any anesthesia From today s perspective this is barbaric It is urgent to make the same intellectual revolution for the psychological pain and emotional distress of the infant which is detectable and curable if we know how to spot the signs from birth The psychological future of thousands of babies every year depends on it Let s save human babies A child psychiatrist in France for 25 years the author has received three awards for his work on children from the Aide Sociale l Enfance the Fondation pour la Recherche M dicale and the Observatoire National de l Enfance en Danger He was also the winner of a short story contest on psychiatry He has worked for more than 20 years in a nursery in Maine et Loire in the west of France **The Theater of Trauma** Michael Cotsell,2005 The Theater of Trauma is a groundbreaking rereading of the relations between psychology and drama in the age of Eugene O Neill Susan Glaspell and their many brilliant contemporaries American modernist Theater of Trauma drew its vision from the psychological investigation of trauma and its consequences among them hysteria and dissociation made by French and American psychiatrists such as the great Pierre Janet Alfred Binet William James Morton Prince and W E B Du Bois the European and American dissociationist culture that developed around their work and the resulting trauma of World War I American dramatists deep resistance to Freud s suppression of trauma challenges the equation of Freud and modernism that has become commonplace in modernist criticism *It Was Only for a Moment* Termica Shontel Harris,2008
