Exploration Seismology R. E. Sheriff, L. P. Geldart, 1995-08-25 This is the completely updated revision of the highly regarded book *Exploration Seismology*. Available now in one volume this textbook provides a complete and systematic discussion of exploration seismology. The first part of the book looks at the history of exploration seismology and the theory developed from the first principles of physics. All aspects of seismic acquisition are then described. The second part of the book goes on to discuss data processing and interpretation. Applications of seismic exploration to groundwater environmental and reservoir geophysics are also included. The book is designed to give a comprehensive up to date picture of the applications of seismology. *Exploration Seismology*'s comprehensiveness makes it suitable as a text for undergraduate courses for geologists, geophysicists and engineers as well as a guide and reference work for practising professionals.

Seismic Exploration of the Deep Continental Crust Dirk Gajewski, Wolfgang Rabbel, 2012-12-06 DEKORP the German continental reflection seismic program was the major focus of deep seismic research in Germany in the 1980s and 1990s. The seismic sections provided fundamental new insight into deep geological structure of the European continent and the dynamics of continental formation. They formed the basis for worldwide comparative studies of orogenic structure. The complicated signature of the reflections from the deep crust indicated that new processing and interpretation techniques must be considered to better image the crystalline crust. Results of these efforts including pre stack migration, 3 D imaging, shear waves and seismic anisotropy are presented in this special volume. In part the articles open the perspective to new and future research. In part they document research activity triggered by technical and interpretational questions raised by DEKORP field work and profiling results. Many of the presented methods can find immediate application in industrial seismic prospecting. *Geological Survey of Canada, Open File 3600*, **Canadian Journal of Exploration Geophysics**, 1992
