Congress. House, Nature Conservation Klaus-Dieter Hupke, 2023-01-01 Many things happen in nature reserves that are contradictory at first glance For example flower meadows are mown down during maintenance work even though all the plants growing there are protected Elsewhere protected reed beds are burnt down in a fen or the top layer of soil is removed with bulldozers in a dune conservation area Still other areas are to remain completely untouched by human intervention The author Klaus Dieter Hupke shows the different strategies of nature conservation He also shows that nature conservation is mostly not exactly what the term says in essence protection of nature On the contrary in Central Europe nature conservation areas are predominantly the relics of old agricultural and thus cultural landscapes Often aesthetic aspects of a landscape section are also in the foreground when designating it as a natural monument or nature reserve Moreover nature conservation runs the risk of becoming a substitute action and an alibi for a still growing destruction of traditional and near natural landscape systems in Central Europe as well as globally The updated
