

The background of the slide features a wooden surface. In the upper center, there is a glass filled with a golden beer, topped with a slice of citrus fruit. Below the glass, a shotgun shell is visible, lying horizontally. The shell's base is inscribed with '20 GAUGE' and '3 IN'. The shell is positioned over a black box that has '20 GAUGE' and 'MAGNUM' printed on it in white and yellow. To the right of the shell, the word 'SILVER' is printed in large, bold, red letters on a black background.

Tucker,2020-03-26 This work covers major weapons throughout human history beginning with clubs and maces through crossbows swords and gunpowder up to the hypersonic railgun lasers and robotic weapons under development today *Weapons and Warfare* is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history In addition to providing basic factual information this encyclopedia will delve into the greater historical context and significance of each weapon The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons It then offers entries on more than 650 individual weapons systems Each entry has sources for further reading The weapons are presented

alphabetically within six time periods ranging from the prehistoric and ancient periods to the contemporary period Each period has its own introduction that treats the major trends occurring in that era In addition 50 sidebars offer fascinating facts on various weapons Numerous illustrations throughout the text are also included Elementary Lectures on Artillery Owen,1861 Chambers's Encyclopædia ,1871 **Chambers's Encyclopædia** Ephraim Chambers,1870 **The New International Encyclopaedia** ,1905 **Naval Weapons of World War One** Norman Friedman,2011-12-12 Although the Great War might be regarded as the heyday of the big gun at sea it also saw the maturing of underwater weapons the mine and torpedo as well as the first signs of the future potency of air power Between 1914 and 1918 weapons development was both rapid and complex so this book has two functions on the one hand it details all the guns torpedoes mines aerial bombs and anti submarine systems employed during that period but it also seeks to explain the background to their evolution how the weapons were perceived at the time and how they were actually used This involves a discussion of tactics and emphasises the key enabling technology of fire control and gun mountings In this respect the book treats the war as a transition from naval weapons which were essentially experimental at its outbreak to a state where they pointed directly to what would be used in World War Two Based largely on original research this sophisticated book is more than a catalogue of the weapons offering insight into some of the most important technical and operational factors influencing the war at sea In this respect it is more broadly significant than its title might suggest The New International Encyclopædia Daniel Coit Gilman,Harry Thurston Peck, Frank Moore Colby,1903 Chambers's Encyclopaedia ,1883 Munitions Industry: September 4-6, 1934.
