Masters Theses In The Pure Appli Volume 25:

Physics and Applications of Hydrogen Negative Ion Sources Marthe Bacal, 2023-05-10 This book gives a comprehensive overview of hydrogen negative ion sources and their applications to particle acceleration and nuclear fusion. The book begins with fundamental aspects of negative ion production by volume and surface processes in hydrogen and its isotopes. It covers key topics such as the need for separation of negative ion production and extraction regions, the need for lowering the work function of the plasma electrode by using caesium vapor or special materials for caesium free sources, and the ion extractor structure required for hydrogen negative ion sources. Chapters covering various specific ion sources and applications are written by scientists who participated in their development and include sources for accelerators and for neutral beam injection into controlled nuclear fusion reactors. *Catalog of Copyright Entries. Nonlinear PDE's and Applications Stefano Bianchini, 2011-07-30 This volume collects the notes of the CIME course Nonlinear PDE s and applications held in Cetraro Italy on June 23-28, 2008. It consists of four series of lectures delivered by Stefano Bianchini (SISSA Trieste), Eric A. Carlen (Rutgers University), Alexander Mielke (WIAS Berlin), and C. d'ric Villani (Ecole Normale Supérieure de Lyon). They presented a broad overview of far-reaching findings and exciting new developments concerning, in particular, optimal transport theory, nonlinear evolution equations, functional inequalities, and differential geometry. A sampling of the main topics considered here includes optimal transport, Hamilton-Jacobi equations, Riemannian geometry, and their links with sharp geometric functional inequalities, variational methods for studying nonlinear evolution equations and their scaling properties, and the metric-energetic theory of gradient flows and of rate-independent evolution problems. The book explores the fundamental connections between all of these topics and points to new research directions in contributions by leading experts in these fields. *Novye inostrannye knigi, vypisannye BAN SSSR v ... godu*, 1989
