Material Immaterial Botond Bogner, Kengo Kuma, 2009-11-04 Presents more than thirty of the architect's recent works including high profile commissions such as the Suntory Museum in Tokyo and the Ondo Civic Center in Kure the exclusive Lotus House in Zushi large scale urban developments in Sanlitun Village South in Beijing and more ACRN Proceedings in Finance and Risk Series '13 Dr. Othmar M. Lehner, Dr. Richard Harrison, 2014-03-06 Proceedings of the 14th FRAP Finance Risk and Accounting Perspectives conference taking place in Cambridge UK Grounds of the Immaterial Niels van Dijk, 2017-07-28 This book applies a novel conflict based approach to the notions of idea concept invention and immateriality in the legal regime of intellectual property rights by turning to the adversarial legal practices in which they occur In doing so it provides extensive ethnographies of the courts and law firms and tackles classical questions in legal doctrine about the immaterial nature of intellectual property rights from a thoroughly new perspective Melt Miikka Leinonen, 2014-11-10 As a result of technological advancement our material and immaterial worlds are melting together This has huge repercussions for every company Miikka Leinonen combines his extensive background in graphic design with his passion for business and strategy to create a truly unique theory and visual tools for managers to understand and capitalize on this change **The Epigenesis of Mind** Susan Carey, Rochel Gelman, 2014-01-14 Reflecting the focus of a Jean Piaget Symposium entitled Biology and Knowledge Structural Constraints on Development this volume presents many of the emergent themes discussed Among these themes are Structural constraints on cognitive development and learning come in many shapes and forms and involve appeal to more than one level of analysis To postulate innate knowledge is not to deny that humans can acquire new concepts It is unlikely that there is only one learning mechanism even if one prefers to work with general as opposed to domain specific mechanisms The problems of induction with respect to concept acquisition are even harder than originally thought Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers Introducing Architectural Theory teaches you to think as well **Stuff** Klaus Ruthenberg, 2008 *The Yoga of Love*, 2025-05-19 The idea that something can be present at every place has engendered much discussion both in the past and at present Typically

omnipresence is thought to be a divine attribute but the question as to how something can be omnipresent has not been historically confined to the status of a divine being The Oxford Handbook of Omnipresence offers an insight into historical accounts of omnipresence and its developments in ancient medieval modern and contemporary thought It further widens the study of omnipresence by including less widely studied strands of thought on this topic from mystical process theological feminist theological and phenomenological perspectives Additionally whilst the study of omnipresence has typically focused on Christian thinkers the volume broadens the range of voices on this attribute further by including Jewish Islamic Buddhist Sanskrit and Donghak accounts The Handbook provides an introduction to the main facets of omnipresence both historical and contemporary and opens up new avenues for research that are yet to be fully explored

Supreme Court of the State of New York, 1936 *Kalangwan* P.J. Zoetmulder, 2024-02-26 **Material Bernini** Evonne Levy, Carolina Mangone, 2016-04-14 Bringing together established and emerging specialists in seventeenth century Italian sculpture **Material Bernini** is the first sustained examination of the conspicuous materiality of Bernini's work in sculpture architecture and paint The various essays demonstrate that material Bernini has always been tied whether theologically geologically politically or in terms of art theory to his immaterial twin Here immaterial Bernini and the historiography that sustains him is finally confronted by material Bernini Central to the volume are Bernini's works in clay a fragmentary record of a large body of preparatory works by a sculptor who denied any direct relation between sketches of any kind and final works Read together the essays call into question why those works in which Bernini's bodily relation to the material of his art is most evident his clay studies have been configured as a point of unmediated access to the artist's mind to his immaterial ideas This insight reveals a set of values and assumptions that have profoundly shaped Bernini studies from their inception and opens up new and compelling avenues of inquiry within a field that has long remained remarkably self enclosed

controversial religious movement Emerging in the Brazilian Amazon in the 1930s Santo Daime has since spread to many of the world's major cities Santo Daime is a mixture of indigenous popular Catholic Afro Brazilian esoteric Spiritist and new age beliefs and activities Ritual practice is centred on the consumption of a psychotropic beverage called Daime which members believe enhances their interaction with the supernatural world Because Daime is treated as an illegal narcotic in many parts of the world outside of its Brazilian homeland most Santo Daime rituals are practised clandestinely This book unites extensive fieldwork experience with an established theoretical background and makes a significant contribution to understanding the contemporary interface of religion and late modern society Individualization and religious subjectivism pluralization and religious hybridism transformation and detraditionalization globalization and religious identity and commoditization and religious consumption are among the many issues engaged by this book Santo Daime A New World Religion is an accessible and multi disciplinary book suitable for undergraduate students and researchers working in Religious Studies Sociology of Religion Anthropology Cultural Studies and Latin American Studies Art, Religion, Amnesia Donald Preziosi, 2013-12-04 Art Religion Amnesia addresses the relationship between art and religion in contemporary culture directly challenging contemporary notions of art and religion as distinct social phenomena and explaining how such Western terms represent alternative and even antithetical modes of world making In this new book Professor Preziosi offers a critique of the main thrust of writing in recent years on the subjects of art religion and their interconnections outlining in detail a perspective which redefines the basic terms in which recent debates and discussions have been articulated both in the scholarly and popular literature and in artistic political and religious practice Art Religion and Amnesia proposes an alternative to the two conventional traditions of writing on the subject which have been devoted on the one hand to the spiritual dimensions of artistry and on the other hand to the equally spurious aesthetic aspects of religion The book interrogates the fundamental assumptions fuelling many current controversies over representation idolatry blasphemy and political culture Drawing on debates from Plato's proposal to banish representational art from his ideal city state to the Danish cartoons of Mohamed Preziosi argues that recent debates have echoed a number of very ancient controversies in political philosophy theology and art history over the problem of representation and its functions in individual and social life This book is a unique re evaluation of the essential indeterminacy of meaning making marking a radically new approach to understanding the inextricability of aesthetics and theology and will be of interest to students and researchers in art history philosophy and religion and cultural theory **The Materials of Service Design** Johan Blomkvist, Simon Clatworthy, Stefan Holmlid, 2023-12-11 If Design is about forming materials then what are the materials of Service Design In this ground breaking book Johan Blomkvist Simon Clatworthy and Stefan Holmlid explore this question by establishing a discourse around the materials of service design discussing materials as a means to explore what service design is and could be

Metaphysical Themes 1274-1671 Robert Pasnau, 2013-02-07 Robert Pasnau traces the developments of metaphysical

thinking through four rich but for the most part neglected centuries of philosophy running from the thirteenth century through to the seventeenth. At no period in the history of philosophy other than perhaps our own have metaphysical problems received the sort of sustained attention they received during the later Middle Ages and never has a whole philosophical tradition come crashing down as quickly and completely as did scholastic philosophy in the seventeenth century. The thirty chapters work through various fundamental metaphysical issues sometimes focusing more on scholastic thought sometimes on the seventeenth century. Pasnau begins with the first challenges to the classical scholasticism of Bonaventure and Thomas Aquinas runs through prominent figures like John Duns Scotus and William Ockham and ends in the seventeenth century with the end of the first stage of developments in post scholastic philosophy on the continent with Descartes and Gassendi and in England with Boyle and Locke.

Communication and Control Robert MacDougall, 2015-07-01. Communication and Control Tools Systems and New Dimensions advocates a systems view of human communication in a time of intelligent learning machines. This edited collection sheds new light on things as mundane yet still profoundly consequential and seemingly low tech as push buttons pagers and telemarketing systems. Contributors also investigate aspects of remote control related to education, organizational design, artificial intelligence, cyberwarfare, drones, and even binge watching on Netflix. In line with a systems view, the collection takes up a media ecological view. This work will be of interest to students, scholars, and researchers in communication, new media, and technology.

Trinitarian Theology and Power Relations M. Minister, 2014-11-06. This text crafts a trinitarian theology that reorients theology from presumptions about the immateriality of the Trinity toward the places where the Trinity matters: material bodies in historical contexts and the intersecting ways political and theological power structures normalize and marginalize bodies on the basis of material difference.
