O Formigueiro:

Material Poetics in Hemispheric America Rebecca Kosick, 2020-09-04 Reconsiders the lyrical norm that predominates in Anglophone accounts of poetry through a multilingual and transnational lens A bold project that departs from a tradition heavily dominated by the lyric to question the very nature of what counts as poetry A visually exciting text that draws on poetry and art from a wide array of late twentieth and early twenty first century practitioners An interdisciplinary approach to poetry and poetics that opens new avenues for understanding how poetry intersects with philosophies of the object media theory and visual studies A transnational frame that responds to a growing scholarly push to situate American studies within the broader context of the American hemisphere This book examines poets and artists in the Americas during the late twentieth and early twenty first centuries to show how they worked to make language into material objects and material objects into language It builds a theory of material poetics that provides an alternative account of poetry in hemispheric America Rebecca Kosick argues that by reframing American poetry to prominently include object oriented practices within and beyond the United States material poetry can be seen as representing a significant branch of the American poetic tradition

New Perspectives on Brazilian Constructivism Renato Rodrigues da Silva, 2021-08-17 Going beyond current readings of Concretism and Neoconcretism this book shows how these movements were bred in the Brazilian circuit after adapting international constructivism to the cultural conditions of the country Thus based on a systematic investigation in the archives of newspapers of that period this book explores the premises through which Neoconcretism became organized and gained momentum in a series of debates between the avant gardes of São Paulo and Rio de Janeiro debates that focused on the visual arts and poetry as objects of intense aesthetic experimentation and prospective transformation They offer a guide through what seems to be a maze of contradictory theories and purposes Academic readers interested in Latin American and Brazilian art will learn about the contributions of Geraldo de Barros Franz Weissmann Ferreira Gullar Lygia Clark Luiz Sacilotto Willys de Castro and Hélio Oiticica to Brazilian constructivism and will realize that the seven chapters of this book inevitably question the canon of contemporary art In fact the contributions of these artists go beyond national borders since Concretism and Neoconcretism created early versions of interdisciplinary and transdisciplinary art participatory art process art visual poetry performance installation art institutional
