**Come and See** Edward Rommen, 2013-07-18 An Eastern Orthodox Perspective on Contextualization The mission of the Church is to introduce the person of Christ to individual human beings who by faith enter into communion with God This does not involve adapting information to a particular context but rather establishing the context prescribed by God for the presence of Christ wherever we happen to be among the peoples of the world Contextualization then creates a new invitational core context which is host to the presence of the divine person This is defined with the help of the gifts of ecclesial Tradition which enables conditions that facilitate communion and which thus helps us engage the world

*Making Data Talk* David E. Nelson (M.D.), Bradford W. Hesse, Robert T. Croyle, 2009 The demand for health information continues to increase but the ability of health professionals to provide it clearly remains variable The aim of this book is 1 to summarize and synthesize research on the selection and presentation of data pertinent to public health and 2 to provide practical suggestions based on this research summary and synthesis on how scientists and other public health practitioners can better communicate data to the public policy makers and the press in typical real world situations Because communication is complex and no one approach works for all audiences the authors emphasize how to communicate data better and in some instances contrast this with how to communicate data worse rather than attempting a cookbook approach The book contains a wealth of case studies and other examples to illustrate major points and actual situations whenever possible Key principles and recommendations are summarized at the end of each chapter This book will stimulate interest among public health practitioners scholars and students to more seriously consider ways they can understand and improve communication about data and other types of scientific information with the public policy makers and the press Improved data communication will increase the chances that evidence based scientific findings can play a greater role in improving the public's health
