

The Noumenon and the Phenomenon of It All

Phenomenon is the brain's sensing/perception of the what is, within and out of the body, such as hominin brain's can have information about the thing-in-itself as distinct from the thing as it appears to an observer.

The 10 senses used to tell stories, construct worldviews.

Modern humans use their storytelling brains to construct ideology (abstracted systems of belief), i.e. the obfuscation (bewitchment) of our intelligence by means of language.

Phenomenon And Noumenon:

On the Distinction Between Phenomenon and Noumenon in the History of Philosophy Joseph Evans

Sagebeer,1891 **Problems from Kant** James Van Cleve,2003-09-25 This rigorous examination of Kant's Critique of Pure Reason provides a comprehensive analysis of the major metaphysical and epistemological questions of Kant's most famous work. Author James Van Cleve presents clear and detailed discussions of Kant's positions and arguments on these themes as well as critical assessments of Kant's reasoning and conclusions. Expansive in its scope, Van Cleve's study covers the overall structure of Kant's idealism, the existence and nature of synthetic a priori knowledge, the epistemology of geometry, and the ontological status of space, time, and matter. Other topics explored are the role of synthesis and the categories in making experience and objects of experience possible, the concepts of substance and causation, issues surrounding Kant's notion of the thing in itself, the nature of the thinking self, and the arguments of rational theology. A concluding chapter discusses the affinities between Kant's idealism and contemporary antirealism, in particular the work of Putnam and Dummett. Unlike some interpreters, Van Cleve takes Kant's professed idealism seriously, finding it at work in his solutions to many problems. He offers a critique in Kant's own sense, a critical examination leading to both negative and positive verdicts. While finding little to endorse in some parts of Kant's system that have won contemporary favor, for example the deduction of the categories, Van Cleve defends other aspects of Kant's thought that are commonly impugned, for instance the existence of synthetic a priori truths and things in themselves. This vital study makes a significant contribution to the literature while at the same time making Kant's work accessible to serious students.

The Four Lacanian Discourses Jeanne Lorraine Schroeder,2008-08-18 This book proposes a taxonomy of jurisprudence and legal practice based on the discourse theory of Jacques Lacan. In the Anglophone academy, the positivist jurisprudence of H. L. A. Hart provides the most influential account of law. But just as positivism ignores the practice of law by lawyers, even within the academy, the majority of professors are also not pursuing Hart's positivist project. Rather, they are engaged in policy-oriented scholarship that tries to explain law in terms of society's collective goals or in doctrinal legal scholarship that does not try to describe what law is or to supply justifications for it, but which examines the internal logic of law. Lacan's discourse theory has the power to

differentiate the various roles of the practicing lawyer and the legal scholar It is also able to explain the striking lack of communication between diverse schools of legal scholarship and between legal academia and the legal profession Although extremely influential in Europe and South America Lacanian theory remains largely unexplored in the English speaking world outside of the field of comparative literature In taking up the jurisprudential ramifications of Lacan's work *The Four Lacanian Discourses* thus constitutes an original contribution to current theoretical and practical understandings of law

Merleau-Ponty and Buddhism Gereon Kopf, Jin Y. Park, 2009-08-13 *Merleau Ponty and Buddhism* explores a new mode of philosophizing through a comparative study of Maurice Merleau Ponty's phenomenology and philosophies of major Buddhist thinkers such as Nagarjuna Chinul Dogen Shinran and Nishida Kitaro Challenging the dualistic paradigm of existing philosophical traditions Merleau Ponty proposes a philosophy in which the traditional opposites are encountered through mutual penetration Likewise a Buddhist worldview is articulated in the theory of dependent co arising or the middle path which comprehends the world and beings in the third space where the subject and the object or eternalism and annihilation exist independent of one another The thirteen essays in this volume explore this third space in their discussions of Merleau Ponty's concepts of the intentional arc the flesh of the world and the chiasm of visibility in connection with the Buddhist doctrine of no self and the five aggregates the Tiantai Buddhist concept of threefold truth Zen Buddhist huatou meditation the invocation of the Amida Buddha in True Pure Land Buddhism and Nishida's concept of basho In his philosophical project Merleau Ponty makes vigorous efforts to challenge the boundaries that divide philosophy and non philosophy the East and the West experience and concepts the subject and the object and body and mind Combining the Eastern philosophical tradition of Buddhism with Merleau Ponty's phenomenology *Merleau Ponty and Buddhism* offers an intercultural philosophy in which opposites intermingle in a chiasmic relationship and which brings new understanding regarding the self and the self's relation with others in a globalized and multicultural world
