with the mysterious and unexplained the pyramids Easter Island Stonehenge dinosaurs and the list goes on and on as science looks for clues to decipher these puzzles One such mystery surrounds the now extinct creature called the woolly mammoth Author and meteorologist Michael Oard has studied the mammoth and its equally mysterious time period the Ice Age for many years and has come to some fascinating conclusions to help lift the fog engulfing the facts Some of the questions he addresses include What would cause the summer temperatures of the northern United States and European to plummet more than 50 degrees Fahrenheit Why did mammoths become extinct across the entire earth at the same time as many other large mammals Why are the mammoth carcasses found generally in standing positions How could large lakes exist in what are today very dry desert like places What was the source of the abnormal of moisture necessary for heavy snow What caused the cold summer temperatures and heavy snowfall to persist for hundreds of years In logical progression many other Ice Age topics are explained including super Ice Age floods ice cores man in the Ice Age and the number of ice ages This is one of the most difficult eras in geological history for a uniformitarian scientist one who believes the earth evolved by slow processes over millions of years to explain simply because long ages of evolution cannot explain it Provided here are plausible explanations of the seemingly unsolvable mysterious about the Ice Age and the woolly mammoths Frozen in Time *Lost Secrets of the Gods* Michael Pye, Kirsten Dalley, 2014-07-21 Are there 10 000 year old secret societies that still exist today Was there a race of giants that once inhabited the Americas Did ancient Egypt and ancient China have heretofore undiscovered ties *Lost Secrets of the Gods* delves into these ancient mysteries and many more in articles by some of the world s most intrepid and knowledgeable researchers The old paradigms of history are being radically transformed as we discover more evidence of little known cultures and what they achieved Many ancient cultures spoke and wrote of visitors that gave them knowledge and helped shape their societies Who were they and where did they come from We now know that many ancient cultures had advanced knowledge of science agriculture and astronomy only some of which has been rediscovered in the last 100 years Were *The Iliad* and *The Odyssey* really about an epic struggle in pre Celtic Europe What happened to the Persian army that completely disappeared from Egypt 2 500 years ago Did the ancients know how to create psychic guard dogs to protect sacred sites There is much more to history than what has officially been recorded *Lost Secrets of the Gods* reveals startling truths and asks fascinating questions traditional historians have long ignored **Visionary** Graham Hancock, 2022-04-04 The latest archaeology and history redefining book from bestselling author Graham Hancock *Fingerprints of the Gods* who is featured in *Ancient Apocalypse* a hit Netflix original docuseries With the original unabridged text of *Supernatural* I offer the reader an investigation that explores the human experience with psychedelics from the Stone Age to the Space Age and the role of these extraordinary plant medicines as tools to investigate the nature of reality itself Graham Hancock Discover the pathway to the gods Less than 50 000 years ago mankind had no art no religion no sophisticated symbolism no innovative thinking Then in a dramatic and electrifying change described by scientists as the

greatest riddle in human history all the skills and qualities that we value most highly in ourselves appeared already fully formed as though bestowed on us by hidden powers In Visionary Graham Hancock sets out to investigate this mysterious before and after moment and to discover the truth about the influences that gave birth to modern human mind His quest takes him on a journey of adventure and detection from the stunningly beautiful painted caves of prehistoric France Spain and Italy to remote rock shelters in the mountains of South Africa where he finds a treasure trove of extraordinary Stone Age art Hancock uncovers clues that lead him to travel to the depths of the Amazon rainforest to drink the powerful plant hallucinogen ayahuasca with Indian shamans whose paintings contain images of supernatural beings identical to the animal human hybrids depicted in prehistoric caves and rock shelters Hallucinogens such as mescaline also produce visionary encounters with exactly the same beings Scientists at the cutting edge of consciousness research have begun to consider the possibility that such hallucinations may be real perceptions of other dimensions Could the supernaturals first depicted in the painted caves and rock shelters be the ancient teachers of mankind Could it be that human evolution is not just the blind meaningless process that Darwin identified but something more purposive and intelligent something that we have barely even begun to understand Previously published as Supernatural this definitive edition includes a new Introduction by Graham Hancock as well as restored chapters that were omitted from the original paperback release

Faces Milton E. Brener, 2000 Scientists have emphasized the innate genetically based nature of our fascination with the human face and its almost limitless expressive capacity all of which is represented in the art of the last six centuries But little attention has been paid to the anomaly of the vacuous expressions of earlier facial representations Brener attributes this change to a change in the functioning of the human brain as well as the role of cultural factors It is the evolution of both genes and culture that has resulted in a marked increase in the human ability to create and interpret facial expressions The result of this has impacted human behavior

Secrets of the Sun Ronald G. Giovanelli, 1984-08-30

Divining the Future Kurt C. Koehler, 2008-07-30 What is Human Intellectual Evolution Could Darwins concept of evolution be incomplete Darwins theory just might be insufficient mainly because Darwin didnt apply his theory to the most complex organism of all the human intellect There is no question that in the past numerous civilizations have ascended and then receded in terms of military power influence and economic clout Why Will it happen to us Human Intellectual Evolution accurately explains the past and greatly enhances the odds of successfully predicting the future Human Intellectual Evolution drives the process of history forward and illuminates the path ahead Understanding the three variables that affect the rate of intellectual development is critical to predicting the future and more profitably directing our time energy and money The future of the United States what happens next in China and the stability of the Middle East are all critical questions with global consequences Profit and success will accrue to individuals who best grasp the concept of Human Intellectual Evolution and have the courage and fortitude to act upon their convictions
