**Secured Transactions Law Reform** Louise Gullifer, Orkun Akseli, 2016-10-20 Secured transactions law has been subjected to a close scrutiny over the last two decades. One of the main reasons for this is the importance of availability of credit and the consequent need to reform collateral laws in order to improve access to finance. The ability to give security effectively influences not only the cost of credit but also in some cases whether credit will be available at all. This requires rules that are transparent and readily accessible to non-lawyers as well as rules that recognise the needs of small and medium-sized enterprises. This book critically engages with the challenges posed by inefficient secured credit laws. It offers a comparative analysis of the reasons and the needs for a secured transactions law reform as well as discussion of the steps taken in many common law, civil law and mixed law jurisdictions. The book, written under the auspices of the Secured Transactions Law Reform Project, informs the debate about reform and advances novel arguments written by world-renowned experts that will build upon the existing literature and as such will be of interest to academics, legal practitioners and the judiciary involved in secured transactions law around the world. The text considers reform initiatives that have taken place up to the end of April 2016. It has not been possible to incorporate events since then into the discussion. However, notable developments include the banks decree passed by the Italian Government on 29th June 2016 and the adoption of the Model Law on Secured Transactions by UNCITRAL on 1st July 2016. *The Elgar Companion to UNCITRAL* Rishi Gulati, Thomas John, Ben Köhler, 2023-11-03 As one of the most important international organisations in the sphere of international trade law, UNCITRAL aims to help develop and promote uniform private law internationally. This comprehensive Companion delineates the range of issues considered at UNCITRAL as well as assessing the potential for future work and reforms. **Secured Transactions Law Reform in Africa** Marek Dubovec, Louise Gullifer, 2019-10-31 Over the last few decades many countries have reformed their secured transactions law. One of the main reasons has been the clear link between reform and the availability of credit and the drive to improve access to finance, particularly for micro, small and medium-sized enterprises. This book focuses particularly on developing economies in Africa which have legal frameworks influenced by English, French, Belgian, Roman-Dutch and other laws. Reform in this area of law across African countries has taken a number of forms which are explored and discussed in this book. *Secured Transactions Law Reform in Africa* is a mixture of a critical description of the pre-reform law and practice and the reform process itself. It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms. The book sets out a road map for the future of secured transactions reform, primarily in Africa but also in other countries that have undertaken or are contemplating similar reforms. This book is the second in a series of books about Secured Transactions Law in countries around the world and its reform, both on a national and an international scale. The first book, *Secured Transactions Law Reform: Principles, Policies and Practice*, was published in 2016.
