Security Identity And Interests A Sociology Of International Relations

Marko Lehti, David J Smith

Security Identity And Interests A Sociology Of International Relations:

Security, Identity and Interests Bill McSweeney, 1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis. He argues for the unity of the interpersonal, societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic. This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning, inviting a more critical and interpretative approach to understanding the concept and formulating security policy. The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security. Drawing on contemporary trends in social theory, Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy.

Collective Securitisation and Security Governance in the European Union Sonia Lucarelli, James Sperling, Mark Webber, 2020-06-04

Collective Securitisation and Security Governance in the European Union presents an integrated theory of collective securitisation, a theoretical foundation for explaining how the process of collective securitisation sustains and makes effective an identifiable system of regional security governance. The volume demonstrates the empirical utility of collective securitisation in the EU security space through a set of structured case studies focusing on the collective securitisation of terrorism, cyberspace, migration, energy, health and climate change. The contributions to this collection address three questions: Under what conditions does collective securitisation occur? How does collective securitisation affect the scope and domains of EU security governance? And how does collective securitisation explain the emergence of the EU system of security governance? This volume breaks new ground in the field of EU security studies and provides a theoretical orientation that contributes to our understanding of how and why the EU has developed as a security actor in the 21st century. Developing and testing the theory of collective securitisation with reference to some of the most pressing contemporary security issues, *Collective Securitisation and Security Governance in the European Union* will be of great interest to scholars of the European Union and Security Studies. The chapters were originally published as a special issue of *West European Politics*.

Natural Gas at the Frontline Between the EU, Russia, and Turkey Roxana Andrei, 2022-11-16

This book analyses the rapidly unfolding events that have impacted on the European energy dynamics in the light of the war in Ukraine and the energy crisis that have reconfigured since 2022 the European and the global geopolitical scene, dislocating not only crucial natural resources but also the pace of the energy transition and the continent's existential security, its basic trust and sense of continuity. It introduces an innovative interpretation of the conflict and cooperation dynamics in Europe by challenging the reader to look beyond the material aspects of energy security related to supply and demand, consumption, production and prices dynamics which I nonetheless explain in detail. Thus it invites the

audience to explore the deeper layer of motivations that underpin the actors decision to engage in conflict and cooperation by exploring their cognitive and psychological considerations in addition to the material ones For this purpose it presents a new conceptual tool the conflict cooperation perpetuum in order to explain why the same players in this case the EU Russia and Turkey may choose to simultaneously perceive each other as security threats and trade partners engaging in both conflict and cooperation simultaneously with the same Other In addition it proposes to apply the framework of ontological security in order to understand the responses of the EU Russia and Turkey to the major existential crises that have affected them in past years culminating with the war in Ukraine and the energy crisis of 2022 **A Time of Disastrous**

Crisis and Ontological Insecurity Filip Ejdus, 2019-07-01 This book develops a novel way of thinking about crises in world politics By building on ontological security theory this work conceptualises critical situations as radical disjunctions that challenge the ability of collective agents to go on These ontological crises bring into the realm of discursive consciousness four fundamental questions related to existence finitude relations and autobiography In times of crisis collective agents such as states are particularly attached to their ontic

spaces or spatial extensions of the self that cause collective identities to appear more firm and continuous These theoretical arguments are illustrated in a case study looking at Serbia s anxiety over the secession of Kosovo The author argues that Serbia s seemingly irrational and self harming policy vis vis Kosovo can be understood as a form of ontological self help It is a rational pursuit of biographical continuity and a healthy sense of self in the face of an ontological crisis triggered by the secession of a province that has been constructed as the ontic space of the Serbian nation since the late 19th century

European Security in the Twenty-First Century Adrian Hyde-Price,2007-02-12 Combining a sophisticated theoretical analysis with detailed empirical case studies this book provides an original view of the challenges and threats to a stable peace order in Europe The end of Cold War bipolarity has transformed Europe Using structural realist theory Adrian Hyde Price analyzes the new security agenda confronting Europe in the twenty first century Europe he argues is not primed for peace as mainstream thinking suggests rather it faces new security threats and the challenge of multipolarity This critical and original volume looks at European security after the Iraq War the failure of the EU constitution and the change of government in Germany Reflecting on the inherently competitive and tragic nature of international politics it concludes that realism provides the only firm foundations for an ethical foreign and security policy European Security in the Twenty First

Century will appeal to students and scholars of international relations European politics and security studies *Conflict Resolution and Ontological Security* Bahar Rumelili, 2014-12-17 This volume highlights the ways in which the prospect of peace can generate anxieties and consequently set in motion social and political processes that reproduce and reactivate conflicts In analysing this issue the volume builds on the notion of ontological security and its recent applications to international relations theory Although conflicts threaten the physical security of the parties involved they also help settle existential questions about basic parameters of life being and identity and thus over time become sources of ontological security The prospect of peace through the resolution or transformation of conflict threatens to unsettle the stability and consistency of self narratives and their associated routines and habits at the individual group and state levels The contributors argue two key points 1 that ontological insecurity may set in motion political and social processes that reproduce and reactivate conflicts 2 that coping with peace anxieties necessitates the formulation of alternative self narratives at the individual societal and state levels that re situate the Self in relation to Other and to the world at large Consequently the book analyses the ways in which and the conditions under which conflict resolution induces ontological insecurity and the different ways in which ontological insecurity has prevented the successful culmination of peace processes in different conflict contexts including Cyprus Israel Palestine and Northern Ireland This book will be of much interest to students of critical security studies conflict resolution peace and conflict studies social theory and IR in general

Security, the Environment and Emancipation Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of

meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general
