They do not even look into the company or its balance sheets. It is of course one of the ways to invest your money, a foolish way though. People do not try to understand the market as it is. In fact, many of them expect the market to move their way. But that is not how these things work. You have to be both vigilant and unemotional while evaluating a company before investing in it. Here we are going to understand how the economy works, how the company moves according to the market, and how to evaluate the stock's movement according to it. I do need to remind you that although it has been suggested that you do not have to be emotional while investing, yet you should know how people think and what all effects it would have on the company and its stocks.
