Seeds Of Destruction The Science Report On Cancer Research:

Seeds of Destruction Thomas Maugh, 2012-12-06 There is little prospect of an immediate cure for cancer The seeds of destruction seem to be sown within all of us and there is no consensus about how these seeds develop into tumors or about what can be done to halt that development Indeed it is often difficult to find a consensus about any aspect of cancer research The sharply conflicting views of investigators in different subdisciplines has been most aptly summarized by Charles Heidelberger of the McArdle Laboratory for Cancer Research who argues that the mechanism of cancer is a mirror into which each man looks and sees himself This is true despite the fact that large infusions of money and manpower now come to the aid of cancer research In late 1974 Betty Ford and Margareta Happy Rockefeller underwent surgery for breast cancer The extensive publicity surrounding these mastectomies provoked a great deal of interest in the subject of cancer particularly breast cancer Newspaper and television stories associated with the operations gave their audiences some insight into the nature of cancer and cancer research but they provided only a glimpse of the sweeping changes that the directions of cancer research have undergone in the last few years In large part these changes simply reflect the natural progression of research but there is little question that that progression was sharply accelerated by the National Cancer Act of 1971 which initiated what politicians then termed a crusade against cancer

SEEDS OF DESTRUCTION; A SCIENCE REPORT ON CANCER RESEARCH. TH MAUGH (III.), 1975 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1971 First multi year cumulation covers six years 1965 70 **Finalization in Science** Wolf Schäfer, 2012-12-06 These essays on Finalization in Science The Social Orientation of Scientific Progress comprise a remarkable problematic and controversial book The authors propose a thesis

about the social direction of scientific research which was the occasion of a lively and often bitter debate in Germany from 1976 to 1982 Their provocative thesis briefly is this that modern science converges historically to the development of a number of closed theories i e stable and relatively completed sciences no longer to be improved by small changes but only by major changes in an entire theoretical structure Further that at such a stage of mature theory the formerly viable norm of intra scientific autonomy may appropriately be replaced by the social direction of further scientific research within such a mature field for socially relevant or we may bluntly say task oriented purposes This is nothing less than a theory for the planning and social directing of science under certain specific conditions Understandably it raised the sharp objections that such an approach would subordinate scientific inquiry as a free and untrammelled search for truth to the dictates of social relevance and dominant interests even possibly to dictation and control for particularistic social and political interests

Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *When Healing Becomes a Crime* Kenny Ausubel, 2000-05-01 A powerful and substantiated expose of the medical politics that prevents promising alternative cancer therapies from being implemented in the United States Focuses on Harry Hoxsey the subject of the author's award winning documentary who claimed to cure cancer using herbal remedies Presents scientific evidence supporting Hoxsey's cancer fighting claims Published to coincide with the anticipated 2000 public release of the government sponsored report finding noteworthy cases of survival among Hoxsey patients Harry Hoxsey claimed to cure cancer using herbal remedies and thousands of patients swore that he healed them His Texas clinic became the world's largest privately owned cancer center with branches in seventeen states and the value of its therapeutic treatments was upheld by two federal courts Even his arch nemesis the AMA admitted his treatment was effective against some forms of cancer But the medical establishment refused an investigation branding Hoxsey the worst cancer quack of the century and forcing his clinic to Tijuana Mexico where it continues to claim very high success rates Modern laboratory tests have confirmed the anticancer properties of Hoxsey's herbs and a federal government sponsored report is now calling for a major reconsideration of the Hoxsey therapy *When Healing Becomes a Crime* exposes the overall failure of the War on Cancer while revealing how yesterday's unorthodox treatments are emerging as tomorrow's medicine It probes other promising unconventional cancer treatments that have also been condemned without investigation delving deeply into the corrosive medical politics and powerful economic forces behind this suppression As alternative medicine finally regains its rightful place in mainstream practice this compelling book will not only forever change the way you see medicine but could also save your life *Catalog of Copyright Entries.
