Everybody Belongs Arthur Shapiro, 2003-09-01 The evil prosthesis of Captain Hook the comical speech of Porky Pig and the bumbling antics of Mr Magoo are all examples of images in our culture which can become the basis of negative attitudes and subliminal prejudice towards persons with disabilities These attitudes influence and underlie discriminatory acts resulting in negative treatment and segregation A teacher s ability to recognize and counter such images may well determine the success of inclusion and mainstreaming programs in our schools and society Well researched and well written this book offers practical guidance as grounded in solid research to schools that are wrestling with how to mainstream children with disabilities

Body Genre David Scott Diffrient, 2023-11-27 In this groundbreaking work author David Scott Diffrient explores largely understudied facets of cinematic horror from the various odors permeating

classic and contemporary films to the wetness sliminess and stickiness of these productions which he argues practically scream out for a tactile mode of textural analysis as much as they call for more traditional forms of textual analysis Dating back to Carol Clover's and Linda Williams's pioneering work on horror cinema film scholars have long conceptualized this once disreputable category of cultural production as a body genre However despite the growing recognition that horror serves important biological and social functions in our lives scholars have only scratched the surface of this genre with regard to its affective corporeal and sensorial appeals Diffrient anatomizes horror films in much the same way that a mad scientist might handle the body separating and recombining constitutive parts into a new analytical whole Further he challenges the tendency of scholars to privilege human over nonhuman beings and calls into question ableist assumptions about the centrality to horror films of sight and sound to the near exclusion of other forms of sense experience In addition to examining the role that animals living or dead real or fake play in human centered fictions this volume asks what it means for audiences to consume motion pictures in which actors stunt performers and other creative personnel have put their own bodies and lives at risk for our amusement Historically grounded and theoretically expansive *Body Genre Anatomy of the Horror Film* moves the study of cinematic horror into previously uncharted waters and breathes life into a subject that not coincidentally is intimately connected to breathing as our most cherished dividing line between life and death
