Seeing Through The Sun:

Seeing Through the Sun Linda Hogan, 1985 *Seeing Through the Veil* Suzanne Conklin Akbari, 2004-01-01 During the later Middle Ages new optical theories were introduced that located the power of sight not in the seeing subject but in the passive object of vision This shift had a powerful impact not only on medieval science but also on theories of knowledge and this changing relationship of vision and knowledge was a crucial element in late medieval religious devotion In *Seeing through the Veil* Suzanne Conklin Akbari examines several late medieval allegories in the context of contemporary paradigm shifts in scientific and philosophical theories of vision After a survey on the genre of allegory and an overview of medieval optical theories Akbari delves into more detailed studies of several medieval literary works including the Roman de la Rose Dante's Vita Nuova Convivio and Commedia and Chaucer's dream visions and Canterbury Tales The final chapter Division and Darkness centres on the legacy of allegory in the fifteenth century Offering a new interdisciplinary synthetic approach to late medieval intellectual history and to major works within the medieval literary canon *Seeing through the Veil* will be an essential resource to the study of medieval literature and culture as well as philosophy history of art and history of science

Illustrated Catalogue of Stereopticons, Sciopticons, Dissolving View Apparatus, Microscopes, Solar Microscope and Stereopticon Combination McIntosh Battery & Optical Co, 1895 *The Alpha and the Omega* Louisa Crisp, 2023-04-21 Drawing on scores of deep memories from her many clients Louisa Crisp shows that we can be free By shedding negative emotions traumas and conditioning we shine from the Divine essence that lives within This inextinguishable light cannot be taken from us yet many are choosing to live in fear and judgment in separation The Alpha and the Omega takes us on a breath taking journey from the moment our cosmos began to the present day revealing the cause of separation and the beginning of duality The second part of the book focuses on the life of Jesus the first person who was able to let go of his fears completely and to live in total alignment with Source Many valuable memories are revealed from individuals who lived during that time Louisa shows how we can take steps to free ourselves from emotional turmoil caused by separation from our true self By listening above all to our intuition we can embark on a voyage to the very core of our being This we will discover is the path to enlightenment **The Philosophy of Husserl** Burt C. Hopkins, 2011-01-01 Hopkins begins his study with Plato's written and unwritten theories of eid and Aristotle's criticism of both He then traces Husserl's early investigations into the formation of mathematical and logical concepts charting the critical necessity that leads from descriptive psychology to transcendently pure phenomenology An investigation of the movement of Husserl's phenomenology of transcendental consciousness to that of monadological intersubjectivity follows Hopkins then presents the

final stage of the development of Husserl's thought which situates monadological intersubjectivity within the context of the historical a priori constitutive of all meaning An exposition of the unwarranted historical presuppositions that guide Heidegger's fundamental ontological and Derrida's deconstructive criticisms of Husserl's transcendental phenomenology concludes the book By following Husserl's personal trajectory Hopkins is able to show the unity of Husserl's philosophical enterprise challenging the prevailing view that Husserl's late turn to history is inconsistent with his earlier attempts to establish phenomenology as a pure science

Form without Matter Mark Eli Kalderon, 2015-01-29 Mark Eli Kalderon presents an original study in the philosophy of perception written in the medium of historiography He considers the phenomenology and metaphysics of sensory presentation through the examination of an ancient aporia Specifically he argues that a puzzle about perception at a distance is behind Empedocles theory of vision Empedocles conceives of perception as a mode of material assimilation but this raises a puzzle about color vision since color vision seems to present colors that inhere in distant objects But if the colors inhere in distant objects how can they be taken in by the organ of sight and so be palpable to sense Aristotle purports to resolve this puzzle in his definition of perception as the assimilation of sensible form without the matter of the perceived particular Aristotle explicitly criticizes Empedocles though he is keen to retain the idea that perception is a mode of assimilation if not a material mode Aristotle's notorious definition has long puzzled commentators Kalderon shows how read in light of Empedoclean puzzlement about the sensory presentation of remote objects Aristotle's definition of perception can be better understood Moreover when so read the resulting conception of perception is both attractive and defensible

Cherney, 2019-10-22 Ableism a form of discrimination that elevates able bodies over those perceived as less capable remains one of the most widespread areas of systematic and explicit discrimination in Western culture Yet in contrast to the substantial body of scholarly work on racism sexism classism and heterosexism ableism remains undertheorized and underexposed In this book James L. Cherney takes a rhetorical approach to the study of ableism to reveal how it has worked its way into our everyday understanding of disability Ableist Rhetoric argues that ableism is learned and transmitted through the ways we speak about those with disabilities Through a series of textual case studies Cherney identifies three rhetorical norms that help illustrate the widespread influence of ableist ideas in society He explores the notion that deviance is evil by analyzing the possession narratives of Cotton Mather and the modern horror touchstone *The Exorcist* He then considers whether normal is natural in Aristotle's *Generation of Animals* and in the cultural

debate over cochlear implants Finally he shows how the norm body is able operates in Alexander Graham Bell s writings on eugenics and in the legal cases brought by disabled athletes Casey Martin and Oscar Pistorius These three simple equivalencies play complex roles within the social institutions of religion medicine law and sport Cherney concludes by calling for a rhetorical model of disability which he argues will provide a shift in orientation to challenge ableism s epistemic ideological and visual components Accessible and compelling this groundbreaking book will appeal to scholars of rhetoric and of disability studies as well as to disability rights advocates
