Light A. Mark Smith,2014-12-26 From its inception in Greek antiquity the science of optics was aimed primarily at explaining sight and accounting for why things look as they do By the end of the seventeenth century however the analytic focus of optics had shifted to light its fundamental properties and such physical behaviors as reflection refraction and diffraction This dramatic shift which A Mark Smith characterizes as the Keplerian turn lies at the heart of this fascinating and pioneering study Breaking from previous scholarship that sees Johannes Kepler as the culmination of a long evolving optical tradition that traced back to Greek antiquity via the Muslim Middle Ages Smith presents Kepler instead as marking a rupture with this tradition arguing that his theory of retinal imaging which was published in 1604 was instrumental in prompting the turn from sight to light Kepler s new theory of sight Smith reveals thus takes on true historical significance by treating the eye as a mere light focusing device rather than an image producing instrument as traditionally understood Kepler s account of retinal imaging helped spur the shift in analytic focus that eventually led to modern optics A sweeping survey From Sight to Light is poised to become the standard reference for historians of optics as well as those interested more broadly in the history of science the history of art and cultural and intellectual history **The Search Is Over!** Ron

Social Theory, Second Edition John Bratton, David Denham, 2014-01-24 Most texts on classical social theory offer exhaustive coverage of every possible theorist making it difficult to use the book in one semester Capitalism and Classical Social Theory Second Edition represents a departure from this approach by offering solid coverage of the classical triumvirate Marx Durkheim and Weber but also extending the canon strategically to include Simmel four early female theorists and the writings of Du Bois The result is a manageable but thorough examination of the key classical theorists The second edition has been updated throughout and includes two new chapters one on Weber and rationalization and one on Du Bois and his writings on race A new concluding chapter links classical theory to current developments in capitalism during an age of austerity

All Manner of Things Jeffrey A. Vogel, 2023-01-27 The meditations in this collection originated from a series of questions about suffering death and eternal life put to the author by a friend who was dying from cancer These questions included How do we wait upon God and cancer at the same time What do we know of the God to whom we go when we experience only the silence of God in our suffering How do we long for heaven when what we want most is to continue on with our families and loved ones in this life Is heaven removed from this world Does the joy associated with it depend on ignorance of the suffering of those we leave behind And so on The meditations themselves are not intended primarily as answers to these questions so much as an attempt to enter into them more fully the goal being to think about how we might best inhabit those places where doubt and faith grief and hope forsakenness and grace are so often made to coexist For though the tension between suffering and hope cannot ultimately be resolved in this world we can look for ways to stand within it a little more boldly and to fall within it a little more boldly as well We can seek out words or images that allow us to speak about it a little more clearly a language that helps us to find rest in our longing and perhaps also longing in our rest
