Schachter,Lisa Francesca Andermann,2008 In the last 5 years approximately 2 7 million people have been treated for epilepsy and between 0 5% 2% of people will develop epilepsy during their lifetime Up to 5% of the worldwide population may have a single seizure in their lifetime It is further estimated that 60 million people in the World have had at least one epileptic seizure in their lifetime Most shockingly is that between 70 80K people each year in the US alone are diagnosed with epilepsy Because of these figures and Dr Schachter s roll as Director of the Comprehensive Epilepsy Center Dr Schachter sought to create a series of books written from the viewpoint of people with Epilepsy This volume Epilepsy in Our World presents accounts of seizures by patients from 20 different countries Not only are the patient stories presented with the series signature frankness and honesty but the volume also discusses the different impressions and treatment of epilepsy around the world [The Unpredictable](#) Richard Davis,2013-01-24 The purpose of The Unpredictable is to share personal and biographical stories and illustrations from my own experiences as well as others whose lives have been impacted by

epilepsy or disorders Through the written word and the stroke of a brush the old saying A picture paints a thousand words accurately portrays the special people that have been highlighted in the pages of this book At the completion of this book my thoughts went back to what inspired me to write and paint about seizures and living with epilepsy It was my desire to make a living as an artist and settle down in a country home with my family living the life of an artist with a canvas and brush However I have learned through the years that our plans are often contrary to what God has in store for us Living with epilepsy has brought challenges and storms in life that have changed the course and direction of my life In this book the experiences of life with art and epilepsy are put into paintings that I have visualized from this disease My desire is to educate those unfamiliar with epilepsy encourage the ones living with this disease comfort the loved ones who support and assist those living with seizures and open the eyes of doctors who are educated about seizures but have never experienced the challenges faced in living with a seizure disorder
