Arnott,2006-11-20 Consultant eye surgeon Eric Arnott was one of the original pioneers of small incision surgery He was the first to perform modern Phaco surgery in Europe and designed lens implants that have restored the sight to millions of patients The word autobiography is simply insufficient to describe this book which is a remarkable testament to the life works and marriage of a remarkable man The book details the original invention of the lens implant by Harold Ridley who Eric worked with in his early years of medical training It goes on to follow the development of small incision Phaco surgery instigated by Charlie Kelman and the disinterest and contempt held by the peers of these ophthalmologic pioneers The author describes every advance in this field of ophthalmology in fascinating detail The importance to Eric of religion spirituality family life and helping others less fortunate than himself is reinforced in this enthralling and at times very amusing read Arnott draws you into his narrative rousing thoughts of disbelief as you are compelled to continue reading each new chapter and event in his life proving as fascinating as the last Entertaining and illuminating A New Beginning in Sight provides a detailed history of ophthalmology and is essential reading for ophthalmologists other specialists and non

RAF & East German Fast-Jet Pilots in the Cold War Nigel Walpole,2020-11-23 You ll learn what these pilots went through
knowing that their actions or reactions could trigger a global nuclear war Historic Aviation RAF and East German Fast Jet
Pilots in the Cold War is the result of ten years of research involving many visits to the former German Democratic Republic
by a small Anglo German team of military specialists Their purpose was to explore the lives of RAF and East German fighter
and ghter bomber pilots in the air and on the ground at work and play during the Cold War in North Germany The book is
based largely on personal testimony from these pilots coupled with facts drawn from official archives and comment from
other historical sources Where possible political considerations have been avoided and no outright criticism has been
intended readers being left to draw their own conclusions on the thinking strategies equipment and tactics discussed Far
from being an intellectual polemic on the Cold War the text and photographs merely record a slice of history as seen through
the eyes of a select few who took up arms in the defense of their respective homelands and faced each other daily across the
Iron Curtain In an insightful conclusion Nigel Walpole reassess the threat that both sides believed was genuine during those
tense decades of the Cold War and examines the possible course and nature of a conflict which neither NATO nor the

Warsaw Pact wanted but both actively planned for The writer has avoided politics where possible and in doing so reassesses the threat and uncertainty and ultimately the fears both air forces faced It s truly fascinatingl Flypast **Resources in Education** ,1987 **Tupolev TU-22** Sergey Burdin,2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961 It remained in service until replaced by the much modified Tu 22M Backfire which was introduced in the early 1970s and still remains in service It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role carrying either conventional or nuclear bombs The early aircraft had a range of 1 800 miles but later models had a much increased radius of action through the introduction of in flight refuelling This book looks at the design and development of the aircraft up to the introduction of the type M Backfire Details of construction weapon systems photo reconnaissance and jamming equipment are included to cover the several variant models Operational use is explained and the text includes many first hand accounts from Russian aircrew of the period The book will be superbly illustrated by unique official photographs and manuals **AFPTRC-TN.** ,1955 Reductions in the Federal Aviation Administration's Airline Inspector Work Force and the Implications for Airline Safety United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Aviation,1984 *Indefinite Reenlistment and Noncommissioned Officers* Laura L. Miller,2007 In 1998 following congressional approval the U S Army shifted its senior enlisted force from a fixed contract system to indefinite reenlistment theoretically increasing the prestige of senior noncommissioned officers NCOs by recognizing them as career soldiers The Army program requires all soldiers reaching the rank of E 6 with ten years of service to reenlist indefinitely mirroring the management of officers and eliminating reenlistment paperwork The Army has been the only service to adopt this program This study analyzes past and present arguments for and against this policy made by service representatives policymakers and enlisted personnel Reservations about the program include concerns that force planning could be complicated by the unpredictability of NCO separation dates that the quality of the NCO corps could decline without reenlistment screening and that retention and morale could suffer with the loss of reenlistment bonuses and other benefits The intended program boost to NCO morale does not appear to have been realized This report concludes that neither the costs nor benefits of indefinite reenlistment are strong enough to merit a change in policy for either the Army or the other services An appendix provides an overview of indefinite reenlistment programs in other Western nations Rethinking Policy Piloting Sreeja Nair,2022-02-03 Studies key design features of policy pilots influencing their scaling up and mainstreaming into formal policies
