Shame And Jealousy The Hidden Turmoils:

Shame and Jealousy Phil Mollon, 2018-04-24 A volume in the Psychoanalytic Ideas Series published for the Institute of Psychoanalysis by Karnac Here shame and jealousy are examined as hidden turmoils as basic human feelings found in everyone but often suppressed and neglected An unfulfilled need unanswered plea for help and failure to connect with and understand other people are all underlying causes for shame and feeling inadequate The author argues that feelings of shame form an intrinsic part of the analytic encounter but astonishingly this shame laden quality of the psychoanalytic and psychotherapeutic setting is rarely addressed This lucidly written and much needed volume explores the profound effects shame and jealousy can have on self esteem and how this can eventually lead to a chronic condition *Shame and Jealousy* Phil Mollon, 2002 *Shame and Jealousy* Phil Mollon, 2018 *Troubled People, Troubled World* Michael Briant, 2025-03-04 Ethical issues are the stuff of psychotherapy and in fact Freud envisaged the process as one in which an unexamined irrational and oppressive conscience gives way to one more benignly rooted in reason Therapists endeavour to be non judgemental and indeed are no more qualified to pass judgement on others than anyone else do they nevertheless learn anything about ethics from their disciplined listening The same question was asked after the war about the persecution of the Jews and other minorities and it s a very live issue again faced as we are by movements like ISIS or Putinism in Russia that cause great suffering in the name of religious or moral regeneration a bewildering paradox that David Astor former editor of The Observer called the scourge Can psychotherapy throw any light on it or contribute any ideas as to how we might contain if not prevent the barbarism it sanctions Can it offer any insights into a different more inclusive kind of ethics and if so can we glean any guidance from it as to how we might further it These are the questions the author explores drawing on psychoanalytic thinking on these issues for over a century and illustrated by his work with individuals over four decades

Postcolonial Masculinities Amal Treacher Kabesh, 2016-04-08 Exploring the similarities and differences between and across masculinities in the Middle East and the West Postcolonial Masculinities avoids the constant reinforcement of divisions and stereotypes created by the process of othering and the problematic discourse of the clash of civilisations examining instead how subjectivities in Western and Arab societies are intertwined operating through envy of the other and the desire to be at once the same and yet fundamentally separate With a focus on England and Egypt this book reveals the manner in which masculinities are shaped in and through a history of colonialism and postcolonialism irrespective of colour ethnicity religion class sexuality or the wishes of the individual By concentrating on the shared ground of postcolonial masculine subjectivities Postcolonial Masculinities looks beyond the dissonance often iterated between the apparently rational Western man and the apparently oppressive patriarchal Middle Eastern man Shedding light on the shared and distinctive aspects of masculinities across the Middle East and the West whilst illuminating the influences upon them this book will appeal to social scientists with interests in cultural studies masculinities psychoanalytic theory gender and sexuality and colonialism and postcolonialism

Psychoanalytic Energy Psychotherapy Phil Mollon, 2018-03-26 People like to talk We know that talking to an attentive and thoughtful listener can be helpful in clarifying conscious and unconscious feelings thoughts and motivations But is talk enough The complex physiology of anxiety and traumatic stress reactions is often stubbornly persistent despite therapeutic exploration in both conscious and unconscious areas of the mind In the case of severe trauma talking can stir up the emotions and associated bodily disturbance without providing any resolution sometimes leaving clients feeling worse The developing field of energy psychology offers an entirely new perspective and gamut of techniques for locating where these traumatic patterns are encoded They are not in the mind but in the energy system at the interface of psyche and soma By addressing these realms concurrently a powerful therapeutic synergy emerges that allows rapid and deep shifts in the patterns of distress that drive

Emotional Labour and Lesson Observation Ursula Edgington, 2016-11-21 This book presents research on emotion work and the emotional labour of teaching and learning based in England's further education sector where an increasing emphasis on marketised systems means accountability and audit cultures have become embedded within everyday teaching practice. Uniquely this book explores micro level issues of the managerial policies relating to classroom lesson observations as well as the profoundly emotional philosophical aspects of these situations which research asserts cause stress and anxiety for many staff. Drawing on theoretical psychosocial concepts exploring the interplay of hidden or underground micro and macro elements of teaching and learning contexts the book illuminates how the presence of an observer fundamentally alters the dynamics of a classroom. The author argues that it is not necessarily the performativity that creates the stress and anxiety in an observation but the individual's perception of this performativity and how it relates to a wider consideration of their emotional labour in the classroom. For this reason the book puts forward a case for ending the formal graded method of lesson observations in favour of a developmental holistic approach that is sensitive to the emotional nuances of the individuals involved as well as the social and historical contexts of the institutions in which they are situated. The diverse use of lesson observations as a tool for staff development and quality assurance policies make this a valuable resource for educational researchers, policy makers, teachers and managers from many different sectors and backgrounds.

The Analyst's Torment Dhvani Shah, 2022-10-20 Dhvani Shah moves the focus from using psychoanalytic theory and technique to explore the patient's mind from a safe distance. Instead he concentrates on the analyst's feelings, subjective experiences and histories and how these impact on the intersubjective space between analyst and patient. His eight chapters each highlight a particular emotional state or problematic feeling and explore their impact on the analytic work which requires emotional honesty and open reflection. This authenticity is vital for every unique encounter within the shared space of both the analyst and patient. The analyst must strive to be responsive yet disciplined and this requires the work of mentalization. An ability to go there with patients offers the best chance at helping them. The analyst's uncomfortable and disowned emotional states of mind are inevitably entangled with the therapeutic process and this has the potential to derail or facilitate progress. The chapters deal with uncomfortable themes for the analyst to face: arrogance, racism, dread and its close relation, erotic dread, dissociation, shame, hopelessness and jealousy. These bring up common ways in which analysts stop listening and struggle in the face of uncertainty and intensity, the difficulties in facing unbearable experiences with patients such as suicidality, disruptions to being with patients in an affective and embodied way and thwarted fantasies of being the hero. With all of these difficult topics Shah describes painful and tormenting experiences in a clinically meaningful way that allow growth. In this exceptional debut work Shah demonstrates that what analysts feel in their affects, bodies and reveries with patients is vital in helping them to understand and metabolise the patients' emotional experiences. This is a must read for all
