the Columbia and the Lady Washington Lampe argues that the early American Pacific can best be considered through the interaction of four major locations connected through the networks of trade the merchant ship the Northwest Coast Honolulu and Canton Guangzhou In each of these locations the labors of a diverse population of working people was harnessed in the critical labors of empire building including the transportation of goods The central question that the consideration of working people in the Pacific economy during this period is Lampe argues the role of power applied on these laborers by an international capitalist class emerging alongside the Pacific commercial empires Lampe also finds that this power was not uncontested and emerged in response to the activities of labor Working people on the ship and in the port cities found ways to secure their piece of the profitable trade often through illicit means *Black Salt* R. Black Jacks W. Jeffrey. Bolster,2009-06-30 Few Americans black or white recognize the degree to which early African American history is a maritime history W Jeffrey Bolster shatters the myth that black seafaring in the age of sail was limited to the Middle Passage Seafaring was one of the most significant occupations among both enslaved and free black men between 1740 and 1865 Tens of thousands of black seamen sailed on lofty clippers and modest coasters They sailed in whalers warships and privateers Some were slaves forced to work at sea but by 1800 most were free men seeking liberty and economic opportunity aboard ship Bolster brings an intimate understanding of the sea to this extraordinary chapter in the formation of black America Because of their unusual mobility sailors were the eyes and ears to worlds beyond the limited

horizon of black communities ashore Sometimes helping to smuggle slaves to freedom they were more often a unique conduit for news and information of concern to blacks But for all its opportunities life at sea was difficult Blacks actively contributed to the Atlantic maritime culture shared by all seamen but were often outsiders within it Capturing that tension Black Jacks examines not only how common experiences drew black and white sailors together even as deeply internalized prejudices drove them apart but also how the meaning of race aboard ship changed with time Bolster traces the story to the end of the Civil War when emancipated blacks began to be systematically excluded from maritime work Rescuing African American seamen from obscurity this stirring account reveals the critical role sailors played in helping forge new identities for black people in America An epic tale of the rise and fall of black seafaring Black Jacks is African Americans freedom story presented from a fresh perspective

Liberty on the Waterfront Paul A. Gilje, 2012-04-17 Through careful research and colorful accounts historian Paul A Gilje discovers what liberty meant to an important group of common men in American society those who lived and worked on the waterfront and aboard ships In the process he reveals that the idealized vision of liberty associated with the Founding Fathers had a much more immediate and complex meaning than previously thought In *Liberty on the Waterfront* American Maritime Culture in the Age of Revolution life aboard warships merchantmen and whalers as well as the interactions of mariners and others on shore is

recreated in absorbing detail Describing the important contributions of sailors to the resistance movement against Great Britain and their experiences during the Revolutionary War Gilje demonstrates that while sailors recognized the ideals of the Revolution their idea of liberty was far more individual in nature often expressed through hard drinking and womanizing or joining a ship of their choice Gilje continues the story into the post Revolutionary world highlighted by the Quasi War with France the confrontation with the Barbary Pirates and the War of 1812
