Leslie Kern,2011-01-01 When a recent wave of condominium development overtook Toronto women emerged as powerful consumers and reports claimed that home ownership was offering young single women freedom financial independence and personal security Sex and the Revitalized City examines the truth of these claims by exploring the phenomenon from the perspective of women condo owners and planners and developers This fresh perspective on urban revitalization reveals that condo ownership is not freeing women from constraints neoliberal ideologies are remaking women s relationship with the city in the image of fast capital and consumer citizenship Women s emancipation through condominium ownership is a marketing ploy rather than a major shift in gender relations **Industrial Causes of Congestion of Population in New York City** Edward Ewing Pratt,1911 *Shifting Mobility* Dewan Masud Karim,2023-12-01 Offers in depth evolution trends and decision making resources for future mobility Provides analytical capability of new mobility planning and design concepts Delivers practical policy and tools for practitioners to redesign city s mobility systems Examines new technology integration techniques and overcoming challenges Summarizes pioneer project findings and results of smart mobility and technologies Annual Report of the School Committee of the City of Boston School Committee of the City of Boston,1898

City Time David Campbell,Jarrod Shanahan,2025-01-07 City Time is an immersive ethnographic account of the social world and daily activities of men serving their sentences at New York City s Rikers Island Penal colony written by two of its former prisoners The result is a vital glimpse behind the headlines and into the day to day reality of mass incarceration in New York City **Reinventing a Small, Worldly City** Ana Gonçalves,2016-11-10 Focusing on Cardiff the capital city of Wales in the UK this book reflects on a contemporary small European city its development characteristics and present struggles Following a century in which it was dubbed the world s coaltropolis the decline in demand for coal meant that Cardiff endured an acute process of de industrialisation In seeking to address this and the related high levels of unemployment it has experienced a process of cultural and social reinvention since the 1980s and more significantly after Wales turned into a devolved nation in the late 1990s Cardiff s development from a small port into a capital city is examined

and special attention is paid to the city's cultural and social transformation in recent decades that has relied on the expansion of specific cultural clusters and tourism which have been decisive for the transformation of its cultural identity and in shaping the city's individual and collective memories and identities Cardiff epitomises a quintessential case of urban reinvention cultural regeneration and social transformation lying between two apparently contradictory paradigms the need to respond to global demands and the effort to maintain its cultural distinctiveness and Welsh roots Therefore it sets the scene for a wider reflection on small cities especially in the European setting and what generally characterises these cities their liveability cultural creativity and community empowerment as well as the fact that they facilitate mobility and social interaction These worldly cities the book contends present interesting opportunities and challenges at the urban economic social and cultural levels that rely on more human scale people based approaches to cities thus defying existing urban hierarchies and categorisations

The City: The Basics Kevin Archer, 2012-09-10 The City The Basics provides a brief yet compelling overview of the study of cities and city life The book draws on a range of perspectives economic political cultural and environmental aspects are all considered to provide a broad comparison of the evolution of cities in the rich Global North and the poorer Global South Topics covered in the book include a brief history of cities from ancient times to the post modern present the differences between global cities in the North and megacities in the South the environmental impact of urban life and the idea of sustainable cities urban planning urban politics and urban poverty Featuring suggestions for further reading recommended websites and a number of maps and illustrations this is the ideal starting point for those interested in any aspect of cities or urban studies
