Lifshitz, 2016-04-30 The articles in this volume by scholars all pursuing careers in the United States concern the theoretical approaches and methods of early medieval studies Most of the issues examined span the period from roughly 400 to 1000 CE and regions stretching from westernmost Eurasia to the Black Sea and the Baltic This is the first volume of essays explicitly to reassess the heuristic structures and methodologies of research on early medieval Europe Because of its geographic chronological thematic and methodological diversity and scope the collection also showcases the breadth of early medieval studies currently practiced in the United States **The Long Morning of Medieval Europe** Jennifer R. Davis, 2016-12-05 Recent advances in research show that the distinctive features of high medieval civilization began developing centuries earlier than previously thought The era once dismissed as a Dark Age now turns out to have been the long morning of the medieval millennium the centuries from AD 500 to 1000 witnessed the dawn of developments that were to shape Europe for centuries to come In 2004 historians art historians archaeologists and literary specialists from Europe and North America convened at Harvard University for an interdisciplinary conference exploring new directions in the study of that long morning of medieval Europe the early Middle Ages Invited to think about what seemed to each the most exciting new ways of investigating the early development of western European civilization this impressive group of international scholars produced a wide ranging discussion of innovative types of research that define tomorrow's field today The contributors many of whom rarely publish in English test approaches extending from using ancient DNA to deducing cultural patterns signified by thousands of medieval manuscripts of saints' lives They examine the archaeology of slave labor economic systems disease history transformations of piety the experience of power and property exquisite literary sophistication and the construction of the meaning of palace spaces or images of the divinity The book illustrates in an approachable style the vitality of research into the early Middle Ages and the signal contributions of that era to the future development of western civilization The chapters cluster around new approaches to five key themes the early medieval economy early medieval holiness representation and reality in early medieval literary art practices of power in an early medieval empire and the intellectuality of early medieval art and architecture Michael McCormick's brief introductions open each part of the volume synthetic essays by accomplished specialists conclude them The editors summarize the whole in a synoptic introduction All Latin terms and citations and other foreign language quotations are translated making this work accessible even to undergraduates *The Long Morning of Medieval Europe* New Directions in Early Medieval Studies presents innovative research across the wide spectrum of study of the early Middle Ages It exemplifies the promising questions and methodologies at play in the field today and the directions that beckon tomorrow *Medieval Studies* James M.

(Un)doing History Vanita Seth, 2025 Against the grain of much contemporary scholarship within medieval studies this work emphasizes the radical alterity and historical rupture that the Middle Ages represents in European history Through an engagement with three contentious debates in medieval studies historiography race and individuated subjectivity Vanita Seth's work employs postcolonial and postmodern theorizing to explore questions of ontology epistemology racial privileging and emotion and identity in the European Middle Ages and early modern period While the subject matter of this book is historical the stakes are contemporary and political Seth's contention is that it is the very alterity that the medieval represents that enables contemporary scholars and activists to recognize as historical that which is so often posited as natural Writing a history of absence while also engaging radically different ways of being in the world this book argues helps to disrupt the self

evident naturalization of the face to contest knee jerk celebrations of individuality tethered to the human visage and to recognize racism not as an age old nemesis but as a distinctly modern form of organizing power This work is interdisciplinary engaging scholarship in history history of art science studies philosophy feminist theory anthropology race studies and literature and presumes no prior specialized knowledge in medieval studies and or history Essential reading for scholars and students in the fields of medieval and early modern history race historiography identity and emotion studies **Thinking**

Erler,Thomas O'Donnell,Nina Rowe,Nicholas L. Paul,2019-10 *Whose Middle Ages* is an interdisciplinary collection of short accessible essays intended for the non specialist reader and ideal for teaching at an undergraduate level Each of twenty two essays takes up an area where humans have dug for meaning into the medieval past and brought something distorted back into the present in our popular entertainment in our news our politics and our propaganda and in subtler ways that inform how we think about our histories our countries and ourselves Each author teases out the stakes of a history that has refused to remain past and uses the tools of the academy to read and reread familiar stories objects symbols and myths By communicating consensus positions within the academy *Whose Middle Ages* gives non specialists access to the richness of our historical knowledge while debunking damaging misconceptions about the medieval past Myths about the medieval period are especially beloved among the globally resurgent far right from crusading emblems on the shields borne by alt right demonstrators to the on screen image of a lily white European populace defended from actors of color by internet trolls This collection attacks these myths directly by insisting on seeing the relics of the Middle Ages on their own terms Each essay uses its author s academic research as a point of entry and takes care to explain how the author knows what she or he knows and what kinds of tools bodies of evidence and theoretical lenses allow scholars to write with certainty about elements of the past to a level of detail that might seem unattainable By demystifying the methods of scholarly inquiry *Whose Middle Ages* serves as an antidote not only to the far right s errors of fact and interpretation but to its assault on scholarship and expertise as valid means for the acquisition of knowledge *The Making of Medieval History* G. A. Loud,Martial Staub,2017 Essays on the discipline of medieval history and its practitioners from the late eighteenth century onwards A hugely interesting set of essays reflecting on a variety of ways in which medieval history has developed to the present time
