Planning and the Environment in the Modern World Gordon Emanuel Cherry, Anthony Sutcliffe, 1980 **Planning and the Environment in the Modern World.** Gordon E. Cherry, 1980 **How Ideas Shape Urban Political Development** Richardson Dilworth, Timothy P. R. Weaver, 2020-06-12 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in How Ideas Shape Urban Political Development argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel B land Debjani Bhattacharyya Robert Henry Cox Richardson Dilworth Jason Hackworth Marcus Anthony Hunter William Hurst Sally Ford Lawton Thomas Ogorzalek Eleonora Pasotti Joel Rast Douglas S Reed Mara Sidney Lester K Spence Vanessa Watson Timothy P R Weaver Amy Widestrom **Global Urbanism** Michele Lancione, Colin McFarlane, 2021-06-21 Global Urbanism is an experimental examination of how urban scholars and activists make sense of and act upon the foundational relationship between the global and the urban What does it mean to say that we live in a global urban moment and what are its implications Refusing all encompassing answers the book grounds this question exploring the plurality of understandings definitions and ways of researching global urbanism through the lenses of varied contributors from different parts of the world The contributors explore what global urbanism means to them in their context from the ground and the struggles upon which they are working and living The book argues for an incremental fragile and in the making emancipatory urban thinking The contributions provide the resources to help make sense of what global urbanism is in its varieties what s at stake in it how to research it and what needs to change for more progressive urban futures It provides a heterodox set of approaches

and theorisations to probe and provoke rather than aiming to draw a line under a complex changing and profoundly contested set of global urban processes Global Urbanism is primarily intended for scholars and graduate students in geography sociology planning anthropology and the field of urban studies for whom it will provide an invaluable and up to date guide to current thinking across the range of disciplines and practices which converge in the study of urbanism Chapter 36 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution 4.0 license available at <http://www.taylorfrancis.com/books/e/9780429259593>
