Shaping China's Future In World Affairs Robert G Sutter, 2019-06-26 This book considers Chinese foreign policy and China's future role in world affairs in the context of the country's recent past Robert Sutter shows that although it appears to be in U S interests for post Mao leaders to continue moving toward international

norms a post Deng leadership backed by growing economic and military power and reflecting profound changes in China's economy and society could move in markedly different directions. Most foreign powers appear willing to accommodate China avoiding actions that could prompt a sharp shift in Chinese foreign policy but Sutter argues that current U.S. policy intrudes on so many issues that are particularly sensitive for Beijing and for China's future that it represents perhaps the most critical variable determining how China will position itself in world affairs. Concluding that there is no guarantee the United States will use this influence wisely Sutter examines the uncertainty and unpredictability of U.S. foreign policy in the post Cold War environment that work against the creation of an effective U.S. policy toward China.

Principles of an Epistemology of Values Marià Corbí, 2015-10-12 This book addresses the need to create an axiological epistemology. This term refers to knowledge of what is axiological i.e. everything related to human values and the know how on how to manage the study of values. In knowledge societies we know and live axiological projects that we do not receive from anyone but that we must construct ourselves in a situation of continuous change. In view of the fact that the axiological crisis in which we are immersed is the most serious one that humanity has suffered over its long history the seriousness and urgency of the issue in question is evident. Adequate knowledge is required to solve this problem which is at the root of all the problems we are experiencing. This work offers a potential solution that in contrast to the past cannot be definitive but must be transformed throughout the continuous changes to ways of life as a result of technoscience. It will prove of great value to all those who must operate within human values and motivate groups as well as to those interested in spirituality.

where such misconceptions have been refuted by academic research Stewart argues the information has not percolated into the general domain because modern historians writing mainly for one another have lost the wider audience Criticizing his own profession for purporting to be scientific while largely ignoring the implications of for example scientific archaeology Stewart also opens up the closed shop of Irish history for the general reader The result is a landmark book the terrain of Irish history will never be the same again The Routledge Handbook of Mindshaping Tadeusz Wiesław Zawidzki, Rémi Tison, 2025-05-29 Of all species human beings are uniquely capable of coordinating on long term large scale cooperative projects with unfamiliar and genetically unrelated others According to the mindshaping hypothesis this relies on mechanisms and practices like imitation pedagogy normative cognition and narrative self constitution which shape us into expert coordinators without requiring time consuming and epistemically fraught attempts to read each other's minds Mindshaping has been applied to many areas of inquiry including game theory shared agency communication the ontogeny of human cognition the dissemination of scientific knowledge in popular media mental illness and the influence of social media technologies The Routledge Handbook of Mindshaping is the first volume of its kind Comprising 37 chapters by an international team of leading scholars this Handbook is organised into seven sections Mindshaping and coordination Mindshaping and cognitive psychology Mindshaping and normativity Mindshaping and epistemology Social and political dimensions of mindshaping Nonhuman mindshaping Mindshaping applied Within these sections key topics are addressed including game theory social signalling and shared agency folk psychology the emotions language acquisition and memory stereotyping and consciousness raising moral agency self knowledge rationality epistemic norms primate sociality human elephant relations artificial intelligence mental illness and neurodiversity aesthetic expression and politics An outstanding survey of a vibrant and emerging field The Routledge Handbook of Mindshaping will be of great interest to those studying and researching philosophy of psychology philosophy of cognitive science philosophy of mind and applied epistemology It will also be of interest to those in related disciplines such as cognitive psychology sociology and anthropology *Colonized Bodies, Worlds Transformed* Melissa S. desperation Given that the majority of Chinese villages were historically established on the foundation of consanguine relationships creating an obligation among villagers to support one another due to shared ancestry lineage emerged as a microlevel social mechanism that activated diverse forms of collective resistance In villages where peasants effectively upheld their lineage organizations and adopted self protective measures their survival rates exceeded those of villages where the enforcement of Maoist Great Leap initiatives disrupted the lineage structure leaving the communities more vulnerable When Food Became Scare reorients the famine narrative unpacking its intricacies from the perspective of the survival side
