Integrated Care in Psychiatry Paul Summergrad,Roger G. Kathol,2014-04-26 Integrated Care in Psychiatry Redefining the Role of Mental Health Professionals in the Medical Setting is a landmark title in the field offering a clear detailed and cohesive call by leading experts for coordinated care for patients with concurrent psychiatric and medical conditions The renowned editors and authors argue that what is slowly occurring and greatly needed at a faster pace is nothing less than a sea change in the way that psychiatric care will be delivered The current mostly segregated medical and psychiatric model of care has led to the development of competing medical and psychiatric subcultures that have resulted in a lack of dialog among health providers administrators and payers and thus in less than optimal patient outcomes To remedy this problem the book offers a practical insightful road map to achieving the central tenet of health reform truly coordinated patient centered care where the care experience for the patient the medical care itself and the cost outcomes improve as the system changes from fee for service to population based health An invaluable reference for all clinicians policy makers payers administrators and others interested in the debate surrounding healthcare systems Integrated Care in Psychiatry Redefining the Role of Mental Health Professionals in the Medical Setting is a major contribution to the literature

What is commonly referred to in the U S as the mental health care system is not really a system at all While excellent programs exist in every state in every community across America the system is actually a set of fragmented services provided inequitably by a haphazard array of specialty providers often with inadequate resources and only tenuously connected to health care systems for other health needs Crisis is too often the first point of contact for people experiencing a mental illness while year over year increases in rates of anxiety depression traumatic stress and death from suicide and overdose have led many to characterize the current situation as a pandemic or epidemic of mental illness constituting a national emergency For youth and young adults in late 2021 this emergency was formally recognized by the U S Surgeon General in the first Advisory ever issued regarding the nation s mental health **Integrated Care** Anna Ratzliff, Jürgen Unützer, Wayne Katon, Kari A.
