Shear Gold:

Fractures, Fluid Flow and Mineralization Ken McCaffrey, Lidia Lonergan, Jamie Wilkinson, 1999 Hydrothermal mineralization is usually structurally controlled so it is important to understand the role of faulting and fracturing in enhancing rock permeability and facilitating fluid flow and mass transfer This is the main theme of this interdisciplinary volume and the papers included are intended to provide an overview of current ideas at the interfaces of structural geology fluid flow and mineralization research U.S. Geological Survey Professional Paper ,1969 *Geological Survey Circular* ,1968 *U.S. Geological Survey Circular* ,1933 **African Mining '91** Institution of Mining and Metallurgy, 2012-12-06 The second African Mining conference is planned for June 1991 and follows the first very successful event held in May 1987 That full four year period was characterized by substantial changes in the political and economic climate of many countries in both hemispheres Copper prices were relatively firm and the advance and steady demand for nickel and ferrochromium stabilized important sectors of the mineral industry certainly in Zimbabwe The promise for gold remained unfulfilled but the smaller relatively flexible mines survived and only the large deep and low value mines seem seriously at risk None of this has affected the hungry and intensive exploitations from surface to the water table have revealed many targets of promise to those willing to take the risks The pattern in Southern Africa was extraordinarily stable among the turmoil with independence for Namibia adjustments in South Africa and a gradual shift to market economies in the region The pace of exploration has increased to recover some part of the progress that was lost in the Independence struggle and at the end of the first decade in Zimbabwe for example oil is being sought in the Zambesi Rift following the investigation of the Luangwa in Zambia and there are exciting exploration projects for methane released from coal deep in its basins Energy and Mineral Resources for the 21st Century Pei Rongfu, 1997 **Geological Survey Bulletin** ,1949 **The Idler** ,1907

Rock Joints Nick Barton, Ove Stephansson, 1990-01-01 Proceedings of the International Symposium on Rock Joints held at Loen Norway June 1990 Subjects include geological aspects of joint origin and morphology mechanical behaviour such as shear strength hydraulic behaviour and dynamic behaviour **OF1998-04: PACROFI VII, Pan-American Conference on Research on Fluid Inclusions, Program and Abstracts (University of Nevada, Las Vegas, Department of Geoscience, Division of Continuing Education, Las Vegas, Nevada, USA, June 1-4, 1998)** , **U.S. Geological Survey Heavy Metals Program Progress Report 1968** Geological Survey (U.S.), 1968 *Mineralization and Sustainable Development in the West African Craton* T. Aïfa, 2021-07-22 This Special Publication combines results obtained by interdisciplinary groups from numerous academic institutions working on Paleoproterozoic formations to decipher the origins of the main mineralization resources in the West African Craton WAC and their impacts on African economic development Structural geophysical sedimentological stratigraphical geochemical petrophysical and mineralogical analyses have been used to highlight the complexities involved in mineralization emplacement and its origin and evolution within the WAC

Fourteen articles contribute to new knowledge in mineral research They show that the geodynamic evolution of the WAC is complex from one area to another it involves subduction collision and obduction during several deformation phases ranging from Birimian 2 3 2 0 Ga to Pan African 650 450 Ma events Various modelling techniques when integrated help in understanding the mechanisms of mineralization emplacement some of which are still a matter of debate The challenge for further studies is mitigation for sustainable development that can be appropriately used to minimize such damage
