**Japanese Army Stragglers and Memories of the War in Japan, 1950-75** Beatrice Trefalt,2013-01-11 This book charts comprehensively the various discoveries in Southeast Asia and the Pacific of Japanese soldiers still fighting the Second World War many years after it had ended It explores their return to Japan and their impact on the Japanese people revealing changing attitudes to war veterans and war casualties families as well as the ambivalence of memories of the war

**Topographies of Japanese Modernism** Seiji M. Lippit,2002-04-01 What happens when a critique of modernity a revolt against the traditions of the Western world is situated within a non European context where the concept of the modern has been inevitably tied to the image of the West Seiji M Lippit offers the first comprehensive study in English of Japanese modernist fiction of the 1920s and 1930s Through close readings of four leading figures of this movement Akutagawa Yokomitsu Kawabata and Hayashi Lippit aims to establish a theoretical and historical framework for the analysis of Japanese modernism The 1920s and 1930s witnessed a general sense of crisis surrounding the institution of literature marked by both the radical politicization of literary practice and the explosion of new forms of cultural production represented by mass culture Against this backdrop this study traces the heterogeneous literary topographies of modernist writings Through an engagement with questions of representation subjectivity and ideology it situates the disintegration of literary form in these texts within the writers exploration of the fluid borderlines of Japanese modernity

**Japanese Doctors in White Australia** John Lamb,2025-06-02 Lamb tells the stories of an unusual collection of men who by being aliens in a largely unwelcoming country have been omitted from the historical narrative More than a dozen of these medical practitioners arrived and contributed to the welfare of Australian communities during the hundred years prior to the dismantling of race based immigration policies and this book examines not only what they achieved but the political social and economic context in which they operated and the prejudice with which they dealt Through its forensic investigation of archival materials both in Japan and in Australia as well as contact with descendants of the men this study book throws unprecedented light on their trials and tribulations and on the factors most important in determining acceptance and performance in a discriminatory environment Moreover through its many illustrations explanations and general narrative it draws the reader into the personal lives of the doctors and what they faced At the same time its inclusion of detailed mortality and morbidity statistics and their analysis in conjunction with population and economic parameters will doubtless prove an important resource for medical historians In its depth of research and access to relevant information in both countries and languages this book contributes to Australia Japan relations and understanding and sets a new standard in cross cultural research A valuable resource for Australian and Japanese researchers and students of international

immigration medical history the politics and character of racism Asian Studies and International Relations Migrant narratives further enjoy broad international appeal in countries including Asia the United States and Europe     **Placing**

**Internationalism** Stephen Legg, Mike Heffernan, Jake Hodder, Benjamin Thorpe, 2021-11-04 Exploring how modern internationalism emerged as a negotiated process through international conferences this edited collection studies the spaces and networks through which states civil society institutions and anti colonial political networks used these events to realise their visions of the international Taking an interdisciplinary approach contributors explore the spatial paradox of two fundamental features of modern internationalism First internationalism demanded the overcoming of space transcending the nation state in search of the shared interests of humankind Second internationalism was geographically contingent on the places in which people came together to conceive and enact their internationalist ideas From Paris 1919 to Bandung 1955 and beyond this book explores international conferences as the sites in which different forms of internationalism assumed material and social form While international permanent institutions such as the League of Nations UN and Institute of Pacific Relations constantly negotiated national and imperial politics lesser resourced political networks also used international conferences to forward their more radical demands Taken together these conferences radically expand our conception of where and how modern internationalism emerged and make the case for focusing on internationalism in a contemporary moment when its merits are being called into question     Modern Japan, Student Economy Edition Mikiso Hane, 2018-04-27

This book presents the essential facts of modern Japanese history It covers a variety of important developments through the 1990s giving special consideration to how traditional Japanese modes of thought and behavior have affected the recent developments     *Japan, a Modern History* James L. McClain, 2002 Japan A Modern History provides a comprehensive narrative that integrates the political social cultural and economic history of modern Japan from the investiture of Tokugawa Ieyasu in 1603 to the present     Nationalism and Internationalism in Imperial Japan Dick Stegewerns, 2005-07-27

Throughout the history of modern Japan there has been a continuous struggle to create an integrated conception of how a politically and or culturally autonomous Japan might relate to a pluralistic and interactive world The aim of this study is to scrutinise nationalist and internationalist rhetoric by means of comparatively constant factors such as personal views of humanity civilisation progress the nation and the outside world and thus to develop new approaches towards the question of the relationship between Japanese nationalism and internationalism This project brings together a group of comparatively young scholars who analyse how different generations of opinion leaders in the Japanese pre war modern era tried to solve what they perceived as the dilemma of nationalism and internationalism     *Post-Fascist Japan* Laura Hein, 2018-02-22 In late 1945 local Japanese turned their energies toward creating new behaviors and institutions that would give young people better skills to combat repression at home and coercion abroad They rapidly transformed their political culture policies institutions and public opinion to create a more equitable democratic and peaceful society Post Fascist Japan explores this

phenomenon focusing on a group of highly educated Japanese based in the city of Kamakura where the new political culture was particularly visible The book argues that these leftist elites many of whom had been seen as the enemy during the war saw the problem as one of fascism an ideology that had succeeded because it had addressed real problems They turned their efforts to overtly political legal systems but also to ostensibly non political and community institutions such as universities art museums local tourism and environmental policies aiming not only for reconciliation over the past but also to reduce the anxieties that had drawn so many towards fascism By focusing on people who had an outsized influence on Japan s political culture Hein s study is local national and transnational She grounds her discussion using specific personalities showing their ideas about post fascism how they implemented them and how they interacted with the American occupiers **Black Snow**
